# BARE®

## OUR STORY

We're not just in your element, we were born there—in a small shop on the coast of British Columbia, BARE is the brainchild of two divers hellbent on crafting a drysuit capable of surviving the frigid waters of the Canadian Pacific Ocean. With every stitch, our founders innovated. Through every failure, they pushed. Not for profit. For performance. To provide the sport of diving with equipment that fit better, functioned better, and lasted longer.

For over 50 years, we've continued to push, with innovations like our industry-leading Omnired Infrared Technology category, our impenetrable and breathable No-Stitch Technology, and our relentless dedication to Fit, Craftsmanship and Innovation. Heart and passion drive every suit we make. Because, like our founders, our designers don't just make the suits, they dive in them. It's this strong culture and unrelenting dedication that has taken us from that small shop in British Columbia to a truly global brand. And we're just breaking the surface.

So, if you need us, we won't be hard to find. Always, we'll be in your heart, flowing through you,

**IN YOUR ELEMENT.**

# 50TH ANNIVERSARY 3/2MM

**50 YEARS DEEP**

## MEN'S AND WOMEN'S WETSUITS

The 50th Anniversary 3/2mm wetsuits are designed for, and inspired by, the multi-sport water enthusiast who has endless energy and passion for the adventure that awaits. This 3/2mm ensures ultimate performance and protection with our proprietary blend of neoprene and laminate, and outstanding levels of fit, comfort and flexibility with their anatomically correct 3D pattern design.

FULL STRETCH

ARMOR FLEX

KNEE PROTECTION

ZIPPERS

EXTRA LONG

LIMESTONE NEOPRENE

### MATERIALS

Developed from a proprietary blend of neoprene that generates extreme levels of stretch for an easy in and out of the suit, improving comfort and mobility and wrapped in a buttery soft exterior finish.

### THICKNESS

3/2mm

### COLORS

Retro Navy

### SIZES

WOMEN'S: 2, 4, 6, 8, 10, 12, 14

MEN'S: S, M, ML, L, XL, 2XL, 3XL

### FEATURES

- Complex anatomically correct patterns achieve outstanding three-dimensional fit throughout the entire suit, with specific attention given to providing comfort in the shoulder and neck areas by focusing on an ergonomic design
- Developed from a proprietary blend of neoprene that generates extreme levels of stretch for an easy in and out of the suit, improving comfort and mobility and wrapped in a buttery soft exterior finish
- Low-profile collar tab with Velcro® for less bulk and more comfort
- Integrated suit saver that protects your suit from the Velcro® collar tab snagging on your wetsuit
- Extra long heavy-duty back zipper for easy donning and doffing
- Armor-flex knee pads extends the life of the suit in the high-wear area while still providing full stretch performance of the neoprene

# 50TH ANNIVERSARY X-MISSION EVOLUTION <sup>CE</sup>

## MEN'S AND WOMEN'S DRYSUITS

**50 YEARS DEEP**

The 50th Anniversary X-Mission Evolution is ideal for the advanced technical diver, or the recreational diver who wants the best combination of flexibility and durability in a travel-friendly package. This innovative drysuit uses our most advanced materials and construction methods, designed and purpose-built in partnership with a team of technical cave divers to meet their demanding requirements. With material that's rated most flexible among all of our drysuits, this suit is perfect for movement in the water and on the surface, and is highly packable for travel.

### MATERIALS

New colors to celebrate BARE'S 50th Anniversary made of extremely flexible Nylon Micro RipStop Trilaminate is durable and lightweight:  
Weight: 395 gr/sqm.

### COLORS

Military Green/ Anthracite

### SIZES

Men's: S, M, ML, L, XL, 2XL, 3XL, 4XL, (MS, MLS, LS, XLS, 2XLS, 3XLS, 4XLS), (MT, MLT, LT, XLT)

Womens: XS, S, M, ML, L, XL, (XSS, SS, MS, LS, XLS), (MT)

### FEATURES

- 2mm nylon/smoothskin "Smart Collar" with vented neck drain provides an improved seal with the BARE dry hood
- Low-profile valves
- Removable inflator valve backer pad reduces discomfort as a result of the "squeeze" at depths
- Anatomically shaped torso, arms and legs
- Lightweight low-profile plastic dry zipper and offset protected zipper flap to avoid contact between dry zipper and outer flap
- Includes reinforcement patch for heating system
- Low back M-PADZ reinforcement panel for added durability
- Adjustable elastic waistband at the back of the drysuit for snugging up for that perfect fit
- Field replaceable suspenders and crotch strap
- Includes 4-point suspenders
- 2-layer reinforced pee valve patches on the interior fabric for durability
- M-PADZ knee protection
- Includes Tech Boots & 2 Expandable Tech/DATA pockets
- Expandable Tech/DATA pockets w/ 5 bungee cords (3 regular / 2 thick)
- 2 needle "felled seam" construction increases seam integrity, is low profile and less prone to abrasion and finishes for a clean look
- Flexible double taped reinforcement at "critical wear" seam points for added durability

# EXOWEAR

## THE ULTIMATE EXPOSURE PROTECTION

EXOWEAR

INSPIRED BY THE HUMAN BODY'S INNATE DESIRE TO SHIELD FROM THE HARSH EST ELEMENTS, ExoWear provides watersports enthusiasts with ultimate protection against waterborne exposure. ExoWear features generation-defining OMNIRED technology and the outstanding Fit, Craftsmanship and Innovation you expect from all BARE products.

## MATERIALS

3-LAYER FABRIC TECHNOLOGY PROVIDES INDUSTRY-LEADING PROTECTION IN ALL COLD-WEATHER CONDITIONS.

### 1. OUTER LAYER

#### WATER REPELLANT

The outer layer has a durable water repellent finish for a protective shell that absorbs less water and decreases drying time.

### 2. MEMBRANE

#### WINDPROOF

The membrane delivers outstanding protection from wind during high exertion watersports by regulating body temperature and preventing windchill.

### 3. INNER FLEECE

#### QUICK DRY AND WICKING

A capillary effect pulls moisture away from the body towards the outer layer of the suit and a hydrophobic treatment repels water, accelerating suit drying time.

#### BREATHABLE

With breathable wicking properties that are 10 times more breathable than competitors, vapor passes through the microfibrils of the membrane when the body sweats to draw sweat outward.

#### ANTI-MICROBIAL

Microban® antimicrobial treatment provides an added level of protection against damaging microbes such as bacteria that can cause stains, odors, and deterioration of the suit.

# EXOWEAR

## INNOVATION

### 3D PATTERNING

3D Patterning ensures the best shape and fit are achieved by evaluating the tension of the fabric and determining the optimum measure of elasticity and movement.

### 4-WAY STRETCH

4-Way Stretch knit fabric provides more elasticity over 2-way stretch and enhances the freedom of movement by stretching crosswise and lengthwise, compared to 2-way stretch fabric that only stretches in one direction.

### OMNIRED™ TECHNOLOGY

Omnired Infrared Technology is scientifically-proven to deliver thermal warmth and protection, better circulation and faster recovery. Omnired has been proven to provide warmth for longer than similar technology.

WHETHER WINDSURFING, DIVING, SNORKELING OR KAYAKING, EXPERIENCING MORE TIME ABOVE AND BELOW THE WATER IS WHAT MATTERS MOST.

#### SIZES:

**MEN'S:** S, M, ML, L, XL, 2XL, 3XL (MLS, LS, XLS, 2XLS, MT, LT, XLT)

**WOMEN'S:** 2, 4, 6, 8, 10, 12, 14 (4T, 6T, 8T, 6+, 8+, 10+, 12+)

**PRODUCT NUMBERS** MEN'S: 017100BLK

WOMEN'S: 017400BLK

## EXOWEAR FRONT ZIP JACKET

### MEN'S AND WOMEN'S

Zip up warmth and protection or zip down to regulate your body temperature. This versatile piece is ideal for changing conditions and can be used on its own or added to the short sleeve top or vest.

#### FEATURES:

- 3-layer fabric technology
- 2mm Elastek full stretch neoprene at neck and wrists for added comfort and sealing
- 53.3 cm (21 in) YKK durable front zipper for easy on/off and to regulate body temperature
- Flatseam stitching throughout

#### COLORS:

Black

#### SIZES:

**MEN'S:** S, M, ML, L, XL, 2XL, 3XL

**WOMEN'S:** 2, 4, 6, 8, 10, 12, 14

# EXOWEAR LONG SLEEVE TOP

## MEN'S AND WOMEN'S

On its own or under a wetsuit, this long-sleeve top provides great protection from the cold and sun. Mix and match with the pants or shorts for maximum versatility.

### FEATURES:

- 3-layer fabric technology
- 2mm Elastek full stretch neoprene at neck and wrists for added comfort and sealing
- Binding at the hem for premium finish
- Flatseam stitching throughout

### COLORS:

Black

### SIZES:

MEN'S: S, M, ML, L, XL, 2XL, 3XL

WOMEN'S: 2, 4, 6, 8, 10, 12, 14

**PRODUCT NUMBERS** MEN'S: 017101BLK

WOMEN'S: 017401BLK

# EXOWEAR PANTS

## MEN'S AND WOMEN'S

These versatile pants are high-cut with a neoprene waist band and include foot stirrups to keep them in place. Team them up with any top or vest for additional protection.

### FEATURES:

- 3-layer fabric technology
- 2mm Elastek full stretch neoprene waist and ankles for comfort and sealing
- High-cut waist and foot stirrups to ensure pants stay in place
- Flatseam stitching throughout

### COLORS:

Black

### SIZES:

MEN'S: S, M, ML, L, XL, 2XL, 3XL

WOMEN'S: 2, 4, 6, 8, 10, 12, 14

## EXOWEAR HOODED VEST

### UNISEX

The Hooded Vest offers warmth and protection for your core, neck and head while allowing maximum mobility with large arm holes. Great as a standalone product or under a wetsuit for additional warmth.

- 3-layer fabric technology
- Large armholes for mobility and comfort
- 2mm Elastek full stretch neoprene at face for comfort and sealing
- Flatseam stitching throughout

**COLORS:** Black

**SIZES:** 2XS, XS, S, M, ML, L, XL, 2XL, 3XL

**PRODUCT NUMBER** 017904BLK

## EXOWEAR VEST

### UNISEX

For maximum maneuverability, the Vest offers protection for your core while allowing for maximum mobility with large arm holes. It is great as a standalone product or under a wetsuit for additional warmth.

- 3-layer fabric technology
- Large armholes for mobility and comfort
- Flatseam stitching throughout

**COLORS:** Black

**SIZES:** XS, S, M, ML, L, XL, 2XL, 3XL

**PRODUCT NUMBER** 017903BLK

## EXOWEAR HOOD

Great protection and additional warmth for your head during cold water activities.

### FEATURES:

- 3-layer fabric technology
- 2mm Elastek full stretch neoprene at face for comfort and sealing
- Skirt at neck for additional comfort and security
- Flatseam stitching throughout

**COLORS:** Black

**SIZES:** XS, S, M, L, XL, 2XL

**PRODUCT NUMBER** 017900BLK

EXOWEAR

## EXOWEAR GLOVES

These box-cut gloves use a single Amara palm for extra feel and dexterity for any watersport activity. A high-cut wrist on the inside makes them easy to pull on.

### FEATURES:

- 3-layer fabric technology throughout
- Palm print improves abrasion resistance
- Conductive print on thumb and index finger for easy of use with touchscreen device
- 2mm Elastek full stretch neoprene cuffs

**COLORS:** Black

**SIZES:** XS, S, M, L, XL

**PRODUCT NUMBER** 017902BLK

## EXOWEAR SOCKS

Exceptional warmth when used on their own or under boots, these socks are designed to keep your feet toasty.

### FEATURES:

- 3-layer fabric technology
- 3D print on bottom the foot for additional grip
- Flatseam stitching throughout
- 2mm Elastek full stretch neoprene cuffs

**COLORS:** Black

**SIZES:** 2XS/XS, S/M, L/XL, 2XL/3XL

**PRODUCT NUMBER** 017901BLK

# BARE WARMTH

At BARE, we're obsessed with delivering you the ultimate in exposure-wear performance. From the dive site to surf break, we're always looking for new ways to innovate our suits and accessories to enhance your experience in the water. This tireless search has led us to developing and integrating numerous technologies into our three tiers of immersion wear: Ultrawarmth, S-Flex and Flextec. Each offers a unique set of features and value matched for different needs in the water.

		ULTRAWARMTH <sup>+</sup> ULTRAWARMTH	S-FLEX	FLEXTEC
		HEAT METER		
TECHNOLOGY	Graphene	●		
	Omnired™	●		
	Stretch	●●●●●	●●●	●●
	BAREfit Pattern	●	●	●
SUSTAINABILITY	Limestone Neoprene	●	●	●
	Water Based Glue	●		
	Dope Dyed Fibres	●		

## TECHNOLOGY

### GRAPHENE FIBERS

Graphene is the world's thinnest and strongest heat-conducting material. By using natural heat-capturing characteristics, graphene lining warms up faster than traditional neoprene and holds its heat for longer in-and-out of the water.

### OMNIRED™ TECHNOLOGY

Omnired™ Technology is proven to deliver thermal warmth, protection, and faster recovery. Composed of 13-thermo reactive minerals that are embedded in the fabric of your suit, Omnired™ converts outbound body heat into thermal energy and reflects it back to your body. This allows you to maintain optimal body temperature and stay warm in the water for longer than a traditional, non-Omnired suit.

### BAREFIT PATTERNS

Fit, comfort and performance are at the heart of everything we do and work toward at BARE. Our proprietary BAREfit Patterns play a large role in that, simultaneously bringing together flexibility and performance all under one seam. In fact, we believe so much in our BAREfit patterns, you have a full two weeks to return your suit if it doesn't fit to your level of expected performance.

## SUSTAINABILITY

### LIMESTONE NEOPRENE

Our wetsuits are made using a clean limestone-based foam that minimizes pollution while performing at the same level (or higher) as petroleum-based alternatives. Limestone neoprene provides better insulation in the water, increased stretch and comfort, a lightweight feel and strong durability.

### WATER-BASED GLUE

We use a water-based glue, rather than solvent, that performs equally well over the long life of your suit, but spares the air of unclean toxins during the production process. Although our glue is water-based, it won't dissolve in water. It is just as strong, if not stronger, than traditional wetsuit glue.

### DOPE-DYED FABRIC

To combat water waste and chemical discharge during production, we use dope-dyed fabric. Dope-dyed fabric requires less chemical waste than traditional methods, such as wet processing, and can cut overall water consumption by over 10%. Plus, dope-dyed fabrics are generally more economical than their dirtier cousins, benefitting both the price tag and the environment.

\* Ultrawarmth Graphene

**TO REDUCE OUR ECOLOGICAL FOOTPRINT, MANY OF OUR SUITS NOW COME IN COMPOSTABLE BAGS OR CARDBOARD BOXES THAT MAY BE RECYCLED.**

Thank you for helping us minimize our environmental impact!

VELCRO

ADJUSTABLE 360° NECK SEAL

### MATERIALS

Elastek full-stretch neoprene combined with Graphene Omnired fabric for our highest degree of warmth, stretch, and comfort.

**THICKNESS** 7mm <sup>CE</sup>, 5mm <sup>CE</sup>, 3mm

### COLORS

Black

Blue

### SIZES

S, M, ML, L, XL, 2XL, 3XL, 4XL

(MLS, LS, XLS, 2XLS, MT, MLT, LT, XLT - Available in black only)

### FEATURES

- Graphene Omnired placed strategically in the body's core area of the suit, allowing lateral movement of the warmth generated by the body to move from warm areas of the lining to cooler areas
- Velcro® adjustable 360° neck seal with booklet-style cover to prevent the Velcro® from snagging and pilling the suit
- Seamless underarms for superior comfort when worn on its own, with an additional wet layer or with a BCD
- Extra long 53.3 cm (21") G-lock 2 back zipper for easy entry with offset tooth design guards against water entry keeping you warmer
- Full length zipper puller with silicone print for easy grip; grip tab at base
- Skin-2-Seal sealing at the wrists and ankles, minimizing water entry through the sleeves and legs and allowing boots and gloves to integrate with the Glideskin seals
- PROTEKT highly flexible, durable, abrasion-resistant kneepads
- Anatomically correct pattern for three dimensional fit throughout for superior fit, comfort, and mobility
- Neck zipper to eliminate any pressure at the neck between dives
- Secure strap on each wrist to secure a wrist computer in place

#### 7MM + 5MM:

- Comfortable contoured 5mm Glideskin collar with 360 degree neck seal
- Wrist and ankle zippers for easy donning
- Skin-to-skin double 3mm/2mm Glideskin wrist and ankle seals, with fused-cut finished edges

#### 3MM:

- Comfortable contoured 3mm Glideskin collar with 360 Velcro® adjustment
- Skin-in fused cut wrist and ankle seals

VESTS

## 7MM STEP-IN HOODED VEST

The full-stretch choice to layer with any 7mm or 5mm full suit for extra warmth on colder dives.

### MATERIAL:

S-FLEX full-stretch neoprene for extreme comfort and mobility.

### FEATURES:

- S-FLEX is developed from a proprietary blend of neoprene that generates extreme levels of stretch for an easy in, easy out
- Attached 7mm vented hood with 5mm skin-in face seal
- Heavy-duty front zipper
- Skin-in seals around the shoulders
- Double glued with secure-lock construction

**COLORS:** Black

**SIZES:** 2, 4, 6, 8, 10, 12, 14 (4T, 6T, 8T)

**PRODUCT NUMBERS 003468BLK**

## 7/3MM + 5/3MM ULTRAWARMTH HOODED VEST

Take your wetsuit system to a new level of warmth.

### MATERIAL:

Soft, high-loft Omnired technology in the fabric throughout helps conserve lost body heat and accelerates thermal recovery.

### FEATURES:

- Soft high-loft fabric for extra warmth throughout
- 7/3mm: Attached 7mm vented hood with 5mm skin-in face seal
- 5/3mm: Attached 5mm vented hood with 3mm skin-in face seal
- 3mm torso
- Double glued with secure-lock seam construction improves isolation and reduces flushing keeping you warmer and diving longer
- BARE's GEN2 hood vent allows trapped air to escape without allowing water to enter
- Mask strap grip pad on the back of the hood secures your mask strap in place
- [7/3 Ultrawarmth Hooded Vest available while supplies last](#)

**COLORS:** Black

**SIZES:** 2, 4, 6, 8, 10, 12, 14

MANTA SHORTY

# IMM GUPPY SHORTY

The Guppy is a “de-tuned” wetsuit made specifically for young toddlers.

## MATERIAL:

The Imm neoprene body provides warmth and UV protection at the same time. The nylon/spandex sleeves and side panels provide flexibility, comfort and room to grow.

## FEATURES:

- Imm neoprene body for warmth
- 170g UV Nylon/Spandex sleeves and side panels for flexibility and sun protection
- 50+ UV protection - highest available
- Wind shield and abrasion protection
- Flatlock construction provides comfort and stretch

**COLORS:** Blue, Purple

**SIZES:** 2, 4, 6 yrs

**PRODUCT NUMBER** 001854BLU, 001854PUR

# IMM DOLPHIN FLOATY

UV protection, flotation, and a swimming aid all in one.

## MATERIAL:

The flotation panels can be removed as the child’s swimming skills improve and the spandex lower body stretches to accommodate a variety of size and diapers.

## FEATURES:

- Imm neoprene upper body
- Removable flotation panels
- Can be used as a swim trainer or just for buoyancy and added safety
- 50+ UV protection - highest available
- 170g UV Nylon/Spandex fabric in arms and lower body
- Wind shield and abrasion protection
- Flatlock construction for comfort and stretch

**COLORS:** Blue, Purple

**SIZES:** 2, 4, 6 yrs

**PRODUCT NUMBER** 001855BLU, 001855PUR

YOUTH AND KIDS

## 2MM TADPOLE SHORTY

The Tadpole is designed for kids ages 2 through 6.

### MATERIAL:

2mm neoprene.

### FEATURES:

- Heavy-duty back zipper
- BARESKIN chest plate sheds water and increases warmth
- Rolled edges with zigzag stitching on arms and legs
- Flatseam construction throughout for stretch and comfort

**COLORS:** Blue, Purple

**SIZES:** 2, 4, 6 yrs

**PRODUCT NUMBER** 001863BLU, 001863PUR

## 7/6MM HOODED + 7/6MM + 5/4MM MANTA FULL

From big days exploring the reef to taking laps in the deep end of the pool, the Manta Full is a great suit for extending your session in cooler waters. Burly 7/6mm neoprene and a cozy hood keeps heat consolidated on any adventure.

### MATERIAL:

7/6: 7mm neoprene torso with 6mm arms and legs.

5/4: 5mm neoprene torso with 4mm arms and legs.

### FEATURES:

- 7/6mm: Comfortable 5mm Glideskin collar with Velcro® adjustment
- 5/4mm: Comfortable 3mm Glideskin collar with Velcro® adjustment
- Heavy-duty back zipper with skin-to-skin internal sealing flap
- Loop at base of zipper assists donning
- Internal skin-in flip seals at mid-forearm and mid-calf to reduce water entry
- Armor flex kneepads provide total flexibility, durability and comfort
- Anatomically correct pattern for 3D fit throughout
- Heavy-duty ankle zippers for easy donning
- Double-glued with secure-lock construction

**COLORS:** Blue

**SIZES:** 8, 10, 12, 14, 16 yrs.

**PRODUCT NUMBERS** 7/6MM HOODED: 002867BLU 7/6MM: 002866BLU 5/4MM: 002865BLU

# 3/2MM MANTA FULL

Ideal for mellow outings in forgivingly warm waters, the 3/2mm Manta Full is perfect for a causal day in the water. Tough neoprene beats back abrasions and an anatomical fit optimizes comfort for hours of movement.

### MATERIAL:

3mm neoprene torso with 2mm arms and legs.

### FEATURES:

- Heavy-duty back zipper
- BARESKIN chest plate sheds water and increases warmth
- Rolled edges with zigzag stitching on arms and legs
- Armor-flex kneepads provide total flexibility, durability and comfort
- Anatomically correct pattern for 3D fit throughout
- Flatseam construction throughout for stretch and comfort

# BARE DRYSUIT RATINGS

At BARE, we strive for our drysuits to provide ultimate comfort in all elements. Our custom design and advanced materials combine to ensure optimal fit, ease of movement, comfort, and protection from abrasions and punctures. Every suit we craft has a purpose, and is tailored for all types of situations. BARE is increasing its commitment to choice by providing our official drysuit ratings, so our customers can better evaluate their purchases.

The chart below provides each drysuit with a rating between 1 and 10, in the categories of

**FIT**

**FLEXIBILITY &  
EASE OF MOVEMENT**

**ABRASION  
RESISTANCE**

**DURABILITY**

## FIT DEFINITIONS

**FORM** - a snug-fitting suit similar to a wetsuit. Applies to stretch neoprene suits.

**CLOSE** - a trim low profile fit.

**REGULAR** - capable of moderate-to-heavy undergarments and holds more gas volume.

**LOOSE** - for dives in extremely cold conditions to accommodate heavier undergarments.

## FOR THE MOST ADVENTUROUS DIVES

The Expedition series suit is constructed out of our most durable and abrasion-resistant fabric, with a cut and fit that more closely resembles the X-Mission. We've bolstered this suit with hardwearing features that minimize bulk and improve flexibility and performance in the water for technically demanding dives. Material ratings make it one of the most robust and longest wearing suits on the market, while simplified seam construction improves the suit's durability and longevity.

### MATERIALS

A proprietary blend of lightweight and flexible heavy-duty Nylon and Cordura® fabrics improves overall suit durability extending the life of your drysuit.

Cordura® RipStop fabric for additional protection on the lower sleeves, crotch/seat and lower legs.

MADE-TO-MEASURE

The Sentry Drysuit incorporates thermal and operational capabilities to meet the demands of the commercial or military diver with the flexibility and comfort of a warm water wetsuit. The Sentry is constructed using high density Yamamoto neoprene, our No Stitch Technology, and BARE's latest innovation in torso expansion: Automatic Torso X-Tension system (ATX), that works without the restrictions of a crotch strap.

Our design team has created a suit that delivers the best mix of attributes available in any drysuit on the market today. If you have been looking for the one drysuit that does it all, you've found it.

3.5mm high performance compressed-density neoprene  
"Diamond-Tuff" nylon laminate on the exterior

### COLORS

Black

Red

### SIZES

S, M, ML, L, XL, 2XL, 3XL (MLS, LS, XLS, 2XLS), (MT, MLT, LT, XLT)

### FEATURES

- No Stitch Technology (NST) process makes suits without a single seam stitch. Instead, seams are double-glued and heat-taped delivering superior performance to maximize the life of your drysuit
- Lightweight low-profile plastic dry zipper
- 2mm nylon/smoothskin warm collar with vented neck drain provides an improved seal with the BARE dry hood
- New pre-installed suspender tabs – ready to accept optional suspenders
- K-PADz knee protection

INCLUDED: Drysuit Backpack

PRODUCT NUMBER 011133BLK, 011133RED

# NEX-GEN PRO DRY

## DURABILITY MEETS PRACTICALITY

BACK ENTRY

M-PADz  
KNEE PROTECTION

This drysuit is engineered for maximum functionality. We've taken a straightforward bilaminate drysuit, added eye-catching design elements throughout, and improved its overall durability and wearability through thoughtful construction. With many popular standard features, the Nex-Gen is a quality drysuit at an excellent price.

### SWT

### MATERIALS

BARE's exclusive Nex-Gen fabric is highly abrasion- and contamination-resistant and can be used in a variety of diving conditions – from recreational to commercial (abrasion-resistant polyurethane/nylon bilaminate). Bilaminate fabric is extremely lightweight and packable for easy transportation to and from the dive site.

### COLORS

Black

### SIZES

XS, S, M, ML, L, XL, 2XL, 3XL, (MLS, LS, XLS, 2XLS), (MT, MLT, LT, XLT)

### FEATURES

- Exclusive SWT (Seam Welded Technology)
- Trimmable latex neck seal
- 360° swivel inflator valve (default placement on the center of the chest)
- Adjustable low profile exhaust valve (default valve placement on upper left arm)
- Lightweight low profile plastic dry zipper
- HD bottleneck latex wrist seals with talc bag
- Pre-installed suspender tabs – ready to accept optional suspenders
- M-PADz knee protection with 2mm neoprene backing
- Delivered with compression-resistant Soft Boot

INCLUDED: Drysuit Backpack

PRODUCT NUMBER 011143BLK

# AQUA-TREK I TECH/PRO DRY CE

**LIGHTWEIGHT, BREATHABLE, TRAVEL READY**

These lightweight suits use our exclusively engineered Cordura® Nylon Oxford 4-Layer fabric for a durable and breathable design. The Aqua-Trek I Tech Dry and Pro Dry are ready, no matter where your adventure takes you.

## MATERIALS

Exclusively engineered and durable Cordura® Nylon Oxford 4-Layer fabric

Lighter weight, breathable material that offers enhanced flexibility, abrasion and puncture resistance

## COLORS

TECH DRY: Black PRO DRY: Black

## SIZES

TECH DRY: S, M, ML, L, XL, 2XL, 3XL

PRO DRY: S, M, ML, L, XL, 2XL, 3XL

## FEATURES

- Lighter weight breathable material that offers enhanced flexibility over current butyl trilaminates
- Lightweight low-profile plastic dry zipper
- 2mm nylon/smoothskin "Smart Collar" with vented neck drain provides an improved seal with the BARE dry hood
- Low-profile valves
- Anatomically shaped torso, arms and legs
- M-PADz knee protection with 2mm neoprene backing providing added padding for comfort
- 2 needle "felled seam" construction increases seam integrity, is low-profile and less prone to abrasion, and finishes for a clean look
- Flexible double taped reinforcement at "critical wear" seam points for added durability
- Premium graphics
- Telescoping torso with field replaceable crotch strap (TECH DRY)
- Elastic at the back waist for better fit (PRO DRY)
- Includes 4-point suspenders (TECH DRY)

## OUR TOUGHEST DRY SUIT

FIT: LOOSE
FLEXIBILITY 7
ABRASION RESISTANCE 10
PUNCTURE RESISTANCE 10

The HDC Tech Dry is built for the serious recreational diver, the public safety diver, or the professional water sports diver who requires the most rugged, loose-fit suit for thicker, high-loft undergarments. The HDC Tech Dry is the toughest drysuit we've ever made. Our design team labored over every inch, thoughtfully crafting this durable and naturally fitting drysuit.

CORDURA<sup>®</sup>

CAVE CUT

# EXPEDITION HD2 TECH DRY

LONG LASTING FOR THE MOST ADVENTUROUS DIVES

The Expedition series suit is constructed out of our most durable and abrasion-resistant fabric, with a cut and fit that more closely resembles the X-Mission. We've bolstered this suit with hardwearing features that minimize bulk and improve flexibility and performance in the water for technically demanding dives. Material ratings make it one of the most robust and longest-wearing suits on the market, while simplified seam construction improves the suit's durability and longevity.

## THE DRYSUIT THAT DOES IT ALL

FIT: TECH DRY: CLOSE	PRO DRY: FORM
FLEXIBILITY	10
ABRASION RESISTANCE	10
PUNCTURE RESISTANCE	10

The Guardian drysuit incorporates thermal and operational capabilities to meet the demands of the commercial or military diver with the flexibility and comfort of a warm water wetsuit. The Guardian Tech Dry is constructed using high density Yamamoto neoprene, our new and improved No Stitch Technology, and BARE's latest innovation in torso expansion: Automatic Torso X-tension system (ATX), that works without the restrictions of a crotch strap.

Our design team has created a suit that delivers the best mix of attributes available in any drysuit on the market today. If you have been looking for the one drysuit that does it all, you've found it.

## COMFORT BEYOND YOUR COMFORT ZONE

Brave the icy waters with Ultrawarmth Base Layers featuring Omnired™ Infrared Thermal Technology – determined by the FDA as a heat recovery medical device. Ultrawarmth seals in warmth and creates a protective heat barrier so divers can stay warmer for longer, even during their most chilling adventures.

Advanced stretch breathable fabric draws moisture away from the body and creates a dry zone, next-to-skin barrier, while moisture is dispersed over a larger surface for quick evaporation. Power every dive with Ultrawarmth protection.

### MATERIALS

Omnired Infrared stretch fleece

### COLORS

Black/Lava (Men's)

Black/Aqua (Women's)

### SIZES

MEN'S: S, M, ML, L, XL, 2XL, 3XL, 4XL

WOMEN'S: XS, S, M, L, XL

### FEATURES

- Omnired Infrared stretch fleece has smooth face for easy layering, fleece-brushed back for superior warmth and moisture-wicking performance with Microban® odor control
- Incorporates quick drying characteristics back on the surface and when suit is vented or removed
- High warmth-to-weight ratio delivers the exact warmth and breathability required for dive applications
- Flatlock seams to minimize chafing
- Mix and match sizes of top and pant for a perfect fit
- Pullover design with low crew neck (won't interfere with neck seal)
- Low profile, retractable thumb loops to assist donning
- Men's pants features a brushed elastic waistband for next-to-skin comfort
- Women's pants features a contoured waistband with a continuous drawcord
- Seamless crotch for comfort
- Spandex stirrups keep pants in place while donning mid layer and driesuit

## THE SECOND STAGE IN MOISTURE MANAGEMENT

With fabric selection and design features specifically for dive, this mid layer is the perfect layering piece under a drysuit. The advanced stretch-breathable, compression-resistant fleece provides warmth without bulk. It also maintains insulating values at changing depths, allowing the diver's core temperature to remain stable.

BASE LAYERS

**SB**  
SYSTEM

### MATERIALS

Stretch-breathable and compression-resistant made from polyester/spandex antimicrobial fleece. Includes Polartec® Power Stretch® technology.

### COLORS

Black

### SIZES

**MEN'S:** S, M, ML, L, XL, 2XL, 3XL, 4XL, (MLS, LS, XLS, 2XLS, 3XLS, 4XLS), (MT, MLT, LT, XLT)

**WOMEN'S:** XS, S, M, L, XL, (MT)

### FEATURES

- Compression Resistant Fleece. Exclusively engineered, this is the first and only fleece fabric designed to be worn under a drysuit. Compression resistant fleece reduces the need for "loft" to create a thermal barrier thereby eliminating a "bulky" undergarment. It also maintains insulating values at changing depths allowing the diver's core temperature to remain stable
- 4-way stretch fleece means garment is form-fitting and reduces bulk and lead weight requirements
- High warmth-to-weight ratio delivers the exact warmth and breathability required for dive applications
- Includes moisture management technology that acts as the second stage
- Incorporates quick drying characteristics for rapid evaporation
- Includes antimicrobial properties that inhibit bacterial growth, keeping the fabric fresh and providing odor control
- Front entry zipper offset at the neck to avoid bulk under neck seal
- Low profile thumb loops to assist donning
- Zippered stretch pocket laminated to left waist for key/ID
- Lycra® stirrups keep pants in place when donning drysuit
- Flatseam stitching throughout
- One-piece design for comfort

# SB SYSTEM MID LAYER (TOP & PANTS)

## THE SECOND STAGE IN MOISTURE MANAGEMENT

The advanced stretch breathable compression resistant fleece provides warmth without bulk. It also maintains insulating values at changing depths allowing the diver's core temperature to remain stable.

### MATERIALS

Stretch breathable and compression resistant made from polyester/spandex antimicrobial fleece. Includes Polartec® Power Stretch® technology.

### COLORS

Black

### SIZES

**MEN'S:** S, M, ML, L, XL, 2XL, 3XL

**WOMEN'S:** XS, S, M, L, XL

### FEATURES

- Compression Resistant Fleece. Exclusively engineered, this is the first and only fleece fabric designed to be worn under a drysuit. Reduces the need for "loft" to create a thermal barrier, thereby eliminating a "bulky" undergarment. It also maintains insulating values at changing depths, allowing the diver's core temperature to remain stable.
- 4-way stretch fleece
- High warmth-to-weight ratio delivers the exact warmth and breathability required for dive applications
- Includes moisture management technology that acts as the second stage
- Includes antimicrobial properties that inhibit bacterial growth, keeping the fabric fresh and providing odor control
- Flatseam stitching throughout
- Pullover design has no bulky closures that restrict stretch
- Molded comfort collar reduces neck chafe
- Zippered stretch pockets for key/ID
- Low profile thumb loops to assist donning
- Lower body constructed of lighter weight fabric to reduce bulk when tucked in
- Elastic waistband with drawstring and cordlock keeps the top in position when crouching
- Zipper fly closes downward to allow for a pee valve relief tube (men's version only)
- Lycra® stirrups keep pants in place when donning drysuit

# SUPER HI-LOFT POLARWEAR EXTREME

## SUPER PLUSH AND SUPER WARM

This baselayer offers a double layer of Hi-Loft Thinsulate™ in the torso for extreme cold water diving. If you find that you tend to get cold quickly, this is the drysuit baselayer for you.

### MATERIALS

Super soft RipStop nylon exterior with Double Hi-Loft Thinsulate™ (14.8oz/yd<sup>2</sup> / 500g/m<sup>2</sup>) insulated interior in torso and Single Hi-Loft (7.4oz/yd<sup>2</sup> / 250g/m<sup>2</sup>) in arms and legs.

### COLORS

Black

### SIZES

S, M, ML, L, XL, 2XL, 3XL (MLS, LS, XLS, 2XLS), (MT, MLT, LT, XLT)

### FEATURES

- Entry: Extra long front zipper ("2-way" convenience for men)
- Hydostretch panels for ease of movement
- Lumbare-X-Tender panel in lower back
- Ribbed knit cuffs & collar for secure comfort and fit
- Hand warmer pockets
- Foot stirrups and thumb loops for donning ease
- Grommets positioned for air exhaust and moisture venting
- Articulated knees
- Embroidered BARE chest pocket with zipper

BASE LAYERS

PRODUCT NUMBER MEN'S: 018128BLK

## HI-LOFT POLARWEAR EXTREME

Just like the Super Hi-Loft but without the additional layer of Thinsulate™ in the torso.

### MATERIAL:

Super soft RipStop nylon exterior with Hi-Loft Thinsulate™ (7.4oz/yd<sup>2</sup> / 250g/m<sup>2</sup>) insulated interior

### FEATURES:

- Entry: Extra long front zipper (“2-way” convenience for men and rear “drop seat” zipper for women)
- Hydrostretch panels for ease of movement
- Lumbare-X-Tender panel in lower back
- Ribbed knit cuffs & collar for secure comfort and fit
- Hand warmer pockets
- Foot stirrups and thumb loops for donning ease
- Grommets positioned for air exhaust and moisture venting
- Articulated knees
- Embroidered BARE chest pocket with zipper

**COLORS:** Black

### SIZES:

**MEN'S:** S, M, ML, L, XL, 2XL, 3XL (MLS, LS, XLS, 2XLS), (MT, MLT, LT, XLT)

**WOMEN'S:** XS, S, M, L, XL, (MT)

**PRODUCT NUMBERS MEN'S: 018129 WOMEN'S: 018429**

## CT200 POLARWEAR EXTREME

This underwear uses compressed Thinsulate™, which offers less bulk but still extremely effective insulation for everything but the coldest dives.

### MATERIAL:

Super soft RipStop nylon exterior with B200 Thinsulate™ (6.2oz/yd<sup>2</sup> / 210g/m<sup>2</sup>) insulated interior

### FEATURES:

- Entry: Extra long front zipper (“2-way” convenience for men)
- Hydrostretch panels for ease of movement
- Lumbare-X-Tender panel in lower back
- Ribbed knit cuffs & collar for secure comfort and fit
- Hand warmer pockets
- Foot stirrups and thumb loops for donning ease
- Grommets positioned for air exhaust and moisture venting
- Articulated knees
- Embroidered BARE chest pocket with zipper

**COLORS:** Black

**SIZES:** S, M, ML, L, XL, 2XL, 3XL (MLS, LS, XLS, 2XLS), (MT, MLT, LT, XLT)

## 7MM ULTRAWARMTH DRY HOOD

An Ultrawarmth hood for coldwater diving conditions that uses Omnired™ Infrared Technology to conserve lost body heat and accelerate thermal recovery.

### FEATURES

- Elastek outer fabric and Omnired Highloft inner fabric
- Elastek/Glideskin-in trimmable face and neck glides nicely over your hair
- Hood neck seal mates with drysuit seal/wetsuit collar
- BARE's GEN2 hood vent allows trapped air to escape without letting water enter
- Mask strap grip pad on the back of the hood secures your mask strap in place
- Double glued and blindstitched with Securelock construction improves isolation and reduces flushing keeping you warmer and diving longer

## FORCE I BOOT

Force I is the essential boot to use with all drysuits with soft boots installed. Strong, versatile and breathable, it's the ultimate protective boot for the roughest of conditions.

### FEATURES

- Excellent support, protection and grip for rocky shore entries, and entry of boat decks and ladders
- Heavy-duty sole for added durability and stability
- Durable, breathable, quick-drying materials used on the uppers
- 2mm abrasion resistant neoprene tongue with pocket to hold excess lace cord.
- Reinforced toe and heel cap for foot protection and durability
- Durable coated material around ankle and laces
- Fin tab to prevent strap movement
- Thumb loop on heel for easier donning
- Quick-lock lacing system or easy donning and doffing
- Cord locks on laces are easy to operate with gloved hands, and keep laces secure
- Small, durable, sueded BARE logo on outside ankle

## VEGA INFLATION VALVE

The VEGA Inflation Valve is designed for extended range diving in cold environments. It combines inflation of gas and passage for power cables to heated undergarments, etc. Both ports are swiveling for optimized equipment configuration. The design of the cable port makes it ideal for a variety of cables.

### FEATURES

- Available with low push button
- Both ports are swiveling
- Available with Int'l nipple
- Available with M16 x 1.5 (for 4.5-9 mm cable)
- Fits all SI Tech Valve ports
- Anti-friction washer
- Nipple cover to prevent ingress of particles

# ANTARES DRY GLOVE SYSTEM

Slim, comfortable and ergonomic, dry glove system.

## FEATURES

- Slim, comfortable and ergonomic dry glove system
- Ergonomic design using oval rings resulting in minimal volume
- Follows the arm wrist and hand anatomy feeling like a natural component on the drysuit

## TIPS:

For a non-permanent installation, combine ANTARES DRY GLOVE SYSTEM + ANTARES QCS OVAL SET + QUICK GLOVE.

ANTARES DRY GLOVE SYSTEM can be retrofitted to the Quick Cuff Set if it is already installed on a drysuit.

PRODUCT NUMBER THD035NCL-EA

# ANTARES QCS OVAL SET

The QCS Oval provides the user with the opportunity of quickly changing a torn or broken seal. It also offer a modularity to choose from a variety of seals. QCS Oval has a narrow and oval shape that makes it compact and comfortable.

## FEATURES

- Includes: Wrist Seal (Silicone or Latex), PU-Ring and oval Stiff Ring
- Designed for use with silicone and latex seals
- Works as attachment platform for the ANTARES Dry Glove System
- A slim and comfortable solution with minimum bulk volume
- Increased freedom of movement
- Opportunity to choose from a variety of seals and to change them whenever you want to

**TIP:** Install the ANTARES QCS OVAL SET for a permanent installation that allows for instant replacement of wrist seal.

The most seamless drysuit ordering system is online

**DRYSUITS.BARESPORTS.COM**

At BARE, we ensure you get the highest quality drysuits for every dive situation, and this year we have expanded that level of quality to our drysuit ordering process. You can order your drysuits through our seamless online portal, providing more clarity and efficiency to the ordering process. Within a few minutes, you can select the features, styles, colors, sizes, and much more, to ensure you control every facet of your drysuit order.

## CHOOSE FROM TWO ORDERING OPTIONS

### STOCK

Most Suit Options Available, Shorter Delivery Times,  
Lower Cost. Preferred Choice for Drysuit Pros.

The most cost effective and quickest delivery option. We have streamlined our production process to allow approximately 70% of our suit options to be included in the Custom Stock Suits option, and our Custom Stock configurations represent the most popular features on the market.

**THIS OPTION SHIPS TO THE  
DISTRIBUTOR WITHIN 4-6 WEEKS.**

LEAD TIMES MAY VARY DEPENDING ON SEASONAL FLUCTUATIONS.

- Most cost effective option
- Most time efficient delivery
- Includes most stock sizes, fitting over 90% of the divers wearing BARE suits
- Stock customizations available (except Aqua-Trek I Pro Dry)

### MADE TO ORDER

Maximum Configuration Flexibility with Longer Delivery  
Times & Slightly Higher Cost

The Made to Order option allows for the full range of choices that you expect from BARE, including MADE-TO-MEASURE (MTM) sizing and a larger selection of colors.

**THESE SUITS TYPICALLY SHIP IN 7-8 WEEKS.**

LEAD TIMES MAY VARY DEPENDING ON SEASONAL FLUCTUATIONS.

- Expands custom options available
- Includes all sizes and some customization without going to made to measure
- Made to measure size option available (added fees apply)
- Includes all color options offered
- Allows custom placement of valves

To ensure an accurate and efficient delivery process, BARE requires ALL drysuit orders to be ordered using the official BARE online drysuit order form. Go to [drysuits.baresports.com](https://drysuits.baresports.com).

# BOOT OPTIONS:

A BOOT FOR EVERY UNDERWATER CHALLENGE - CHOOSE THE STYLE THAT MEETS YOUR DEMANDS!

## HD BOOT

### FEATURES

- 4mm compression resistant neoprene
- Heavy duty reinforced toe, upper and heel

### SIZES

3XS, 2XS, XS, S, M, L, XL, 2XL, 3XL, 4XL

---

**PRODUCT NUMBERS** INSTALL TECH BOOTS: 012900BLK

---

## TECH BOOT

### FEATURES

- 3mm compression resistant neoprene
- Streamlined sole and upper
- Ankle Velcro strap

### SIZES

3XS, 2XS, XS, S, M, L, XL, 2XL, 3XL, 4XL

---

**PRODUCT NUMBERS** INSTALL TECH BOOTS: 013911BLK

---

## SOFT BOOT

### FEATURES

- 4mm compression resistant neoprene
- Can be worn with a variety of over boots such as the BARE FORCE I boot

### SIZES

2XS, XS, S, M, L, XL, 2XL, 3XL, 4XL (custom up to 7XL EE available)

---

**PRODUCT NUMBERS** INSTALL SOFT BOOTS: 012901BLK

# BARE VOCABULARY

Over the years, our technical expertise has resulted in the development of many proprietary technologies and innovations. Below you will find a list of these along with a brief description to help you better understand BARE products.

**AMARA PALM** - Exceptionally durable, Amara material allows us to design a very thin glove that is incredibly strong and resistant to abrasion keeping your fingers and hands well protected.

**ARMOR-FLEX PROTECTION** - Uses a special combination of inks that are highly abrasion-resistant and flexible.

**AUTOMATIC TORSO RECOIL (ATR)** - The patented ATR system provides amazing flexibility when you're bending, kneeling and reaching upward. It works by maintaining a tucked fold in the center of the suit allowing the top and bottom to move independently of each other. This great feature eliminates the need for a cumbersome crotch strap.

**AUTOMATIC TORSO X-TENSION (ATX)** - The ATX includes built-in suspenders for torso length adjustment, breathability and easy donning and doffing without the restrictions of a crotch strap.

**COMPRESSED-DENSITY NEOPRENE** - BARE's compressed-density neoprene uses an advanced process that alters the chemical formula during the neoprene foam manufacturing process that results in very dense neoprene foam. Although not compressed from a thicker neoprene sheet, it offers a greater degree of compression resistance than standard neoprene foam.

**DIAMOND-TUFF** - Found on all neoprene drysuits, it is an exterior fabric laminated to neoprene foam that is highly-abrasive and wear-resistant, extending the life of your drysuit.

**DOUBLE GLUED CONSTRUCTION** - Is a manufacturing technique where glue is applied to the ends of two pieces of neoprene prior to stitching them together. This reduces water penetration.

**Elastek** - Our premium full-stretch neoprene providing the highest degree of stretch and comfort.

**GLIDESKIN** - Is a special coating applied to neoprene for an easy glide-on donning and doffing experience and improved sealing reducing water circulation, and keeping you warm.

**GRAPHENE OMNIRED** - Graphene Omnired is placed strategically in the body's core area of the suit. Graphene elements woven into the suit's interior fabric allow for a lateral movement of the warmth area generated by the body to move from warm areas of the lining to cooler areas for added reflective properties to stay even warmer. Lab test have shown a 41°F (5°C) increase in temperature compared to the original Omnired technology.

**HIGH-DENSITY NEOPRENE** - Conventional 6mm neoprene found in our D6 HD drysuit. It provides maximum thermal protection and is enjoyed by divers who still prefer the feel and fit of a conventional neoprene suit.

**HYDROSTRETCH** - A full-stretch panel integrated around the circumference of the arm (where the upper arm of the drysuit underwear meets the shoulder) for improved upper mobility.

**HYPER-COMPRESSED NEOPRENE** - Featured in our Sentry/Guardian drysuits, 7mm neoprene foam is compressed down to 2mm through a process that uses a combination of heat, time and mechanical pressure. The extreme compression gives the material the best option for stability of buoyancy and thermal insulation with varying depths.

**K-PADz** - Kevlar®-like in abrasion and wear resistance, they provide a great balance between overall protection and stretch.

**LUMBARE-X-TENDER** - A full-stretch panel integrated into the lower lumbar area of the drysuit underwear for improved mobility.

**M-PADz** - Designed to work with our latest generation of supple drysuit fabrics to maintain their overall flexibility while providing the highest degree of protection.

**NO STITCH TECHNOLOGY (NST)** - This technology makes suits without a single seam stitch. Instead, seams are double glued and heat taped inside and out. This delivers superior performance and maximizes the life of your drysuit.

**PRO DRY** - A back-entry cross-shoulder drysuit with a dry zipper.

**PROGRESSIVE FULL-STRETCH** - Uses three different full-stretch fabrics targeted at different performance areas of the wetsuit improving overall performance.

**PROTEKT** - Uses a special combination of woven fabrics to provide the next generation of abrasion and wear-resistance and our highest level of stretch for unrestricted movement.

**ROLLED GLIDESKIN SEALS** - Is a sealing system that uses Glideskin rolled around the raw edge of the wetsuit at the wrist or ankle to provide just the right sealing for warmer water dives.

**SCHOELLER® - KEPROTEC** knee protection is an extremely abrasion and tear-resistant fabric. Incorporates Kevlar™ for the highest degree of protection from unwanted punctures and tears.

**SEAM WELDED TECHNOLOGY (SWT)** - This technology makes suits without a single seam stitch. Instead, seams are double glued and heat taped inside and out. This BARE exclusive delivers superior performance and maximizes the life of your drysuit.

**SEAMLESS UNDERARMS** - Eliminates seams running under the arm for improved comfort.

**SECURE-LOCK** - Is a process of joining neoprene on two sides (inside and out) where the stitching needle does not pass through the neoprene. This reduces the number of holes in the wetsuit and therefore less chance of water penetration. This technique also "locks" the stitching in the event that a thread is broken, not allowing it to unravel.

**SET-IN SLEEVE DESIGN** - Incorporates a seam around the shoulder for a closer fit around the arm for better flexibility.

**S-FLEX** - Developed from a proprietary blend of neoprene that generates extreme levels of stretch for an easy in, easy out of the suit, improves comfort and mobility, and is wrapped in a buttery soft exterior finish.

**SKIN-IN FLIP SEALS** - Located on the upper forearm or upper calf area of a wetsuit, SKIN-IN Flip Seals use the extremely effective contact between SMOOTHSKIN and skin to reduce water penetration.

**SKIN-IN SEALS** - Use Glideskin on the inside of the suit (usually around the neck, wrist and ankles) to provide a watertight seal against the skin.

**SKIN-TO-SKIN SEALS** - Is a double seal system found on the wrist or ankles where a boot or glove is sandwiched between two pieces of neoprene (one with GLIDESKIN-IN and one with Glideskin-OUT) providing an extremely effective seal, reducing water penetration.

**SMOOTHSKIN** - Neoprene is heat-pressed resulting in a smooth and "sticky" layer improving the seal against skin.

**TECH DRY** - A self-donning front entry drysuit with a dry zipper.

**THERMALSKIN** - Is a type of neoprene surface finish used on the inside of a layering vest which adheres well to the skin improving the seal and reducing flushing.

**ULTRAWARMTH OMNIRED** - 13 thermo-reactive minerals woven into the fabric of the wetsuit. These minerals react to your body heat converting it to infrared energy and reflecting it back to you, boosting circulation.
