

BARE[®]

2026 BUYER'S GUIDE

A full-page background image showing a diver in a red BARE drysuit swimming in a narrow underwater cave. The diver is wearing a mask, regulator, and has a light on their wrist. The cave walls are made of rough, brownish-yellow rock. The water is clear, and the diver's light illuminates the surrounding rock.

BARE®

OUR STORY

We're not just in your element, we were born there—in a small shop on the coast of British Columbia, BARE is the brainchild of two divers hellbent on crafting a drysuit capable of surviving the frigid waters of the Canadian Pacific Ocean. With every stitch, our founders innovated. Through every failure, they pushed. Not for profit. For performance. To provide the sport of diving with equipment that fit better, functioned better, and lasted longer.

For over 50 years, we've continued to push, with innovations like our industry-leading Omnired Infrared Technology category, our impenetrable and breathable No-Stitch Technology, and our relentless dedication to Fit, Craftsmanship, Sustainability, and Innovation. Heart and passion drive every suit we make. Because, like our founders, our designers don't just make the suits, they dive in them. It's this strong culture and unrelenting dedication that has taken us from that small shop in British Columbia to a truly global brand. And we're just breaking the surface.

So, if you need us, we won't be hard to find. Always, we'll be in your heart, flowing through you,

IN YOUR ELEMENT.

WARRANTY AND SUSTAINABILITY

WETSUIT WARRANTY

All BARE wetsuits are covered by a 2-year warranty on workmanship and materials. The warranty does not cover damage caused by normal wear and tear, misuse, or negligence. The warranty is limited to repair or replacement, at BARE's option. This warranty is rendered invalid by unauthorized repairs. 8/7mm Velocity Semi-Dry warranty on the dry zipper is limited to one year.

DRYSUIT WARRANTY

BARE will honor all seams and workmanship claims for seven years. The warranty excludes damage caused by misuse, neglect and the normal effects of wear and aging. The warranty is limited to repair or replacement at BARE's option and, where permitted by law, does not include consequential or incidental damages. This warranty is rendered invalid by unauthorized repair or use of any Aquaseal Product.

DRYSUIT MATERIALS WARRANTY

BARE drysuit materials, excluding seals and zippers are covered by a 2-year warranty. Seals are covered for 90 days and zippers are covered for one year from the date of original purchase from an authorized BARE dealer. The warranty does not cover damage caused by misuse or neglect or the effects of normal wear and aging. The warranty is limited to repair or replacement at BARE's option and, where permitted by law, does not include consequential or incidental damages. This warranty is rendered invalid by unauthorized repairs or use of any Aquaseal Product.

EXOWEAR WARRANTY

Your BARE Sports Exowear has a 1-year limited warranty on materials and workmanship from date of original purchase from an authorized BARE Sports dealer. If the garment is found to be defective under normal use and proper care, BARE Sports will repair or replace the garment at its sole discretion. The decision to replace or repair a product is made by the BARE Sports Returns Department after receipt of the defective garment.

REPAIR RETURN PROCEDURES

Garments needing repair must be returned to a BARE Sports repair department by requesting an RA#. Send detailed information on areas of garment needing repair. Repairs or replacements will be determined upon inspection by a BARE Sports representative.

- No warranty repair will be accepted without original receipt
- If returning for repair, all products must be clean and dry
- If garment is within warranty, party requiring repair must pay for shipping cost sending in the garment
- If garment warranty has expired, all repairs will be at cost to be determined by BARE Sports and communicated to the requesting party for approval prior to repairing the gear
- Party requiring repair must pay for shipping cost for both sending in and returning of the garment
- At no time does BARE Sports offer refunds

OTHER BARE PRODUCTS WARRANTY

All other BARE products, except where specified, are covered by a 1-year warranty on workmanship and materials. The warranty does not cover damage caused by normal wear and tear, misuse or negligence. The warranty is limited to repair or replacement, at BARE's option, and where permitted by law does not include consequential or incidental damages. This warranty is rendered invalid by unauthorized repairs or use of any Aquaseal product.

PFC FREE

Perfluorinated chemicals, or polyfluorinated chemicals (PFC) are man-made chemicals that have been extensively used since the mid-20th century in a wide array of products, thanks to their remarkable water-resistant properties. These characteristics make them suitable for applications like waterproofing clothing. PFCs don't easily break down, earning them the nickname "forever chemicals." This persistence has led to widespread contamination of water sources, soil, and even the air, causing concerns for both human health and wildlife. In a realm where convenience often overshadows environmental responsibility, BARE takes pride in our commitment to sustainability. We've chosen not to include PFC in our products where possible as a testament to our dedication to our environmental commitment.

ALL BARE PRODUCTS SATISFY EUROPEAN EU NORMS.

EXOWEAR

THE ULTIMATE EXPOSURE PROTECTION

INSPIRED BY THE HUMAN BODY'S INNATE DESIRE TO SHIELD FROM THE HARSH ELEMENTS, Exowear provides watersports enthusiasts with ultimate protection against waterborne exposure. Exowear features generation-defining Omnired™ technology and the outstanding fit, craftsmanship and innovation you expect from all BARE products.

MATERIALS

3-LAYER FABRIC TECHNOLOGY PROVIDES INDUSTRY-LEADING PROTECTION IN ALL COLD-WEATHER CONDITIONS.

1. OUTER LAYER

WATER REPELLANT

The outer layer has a durable water repellent finish for a protective shell that absorbs less water and decreases drying time.

2. MEMBRANE

WINDPROOF

The membrane delivers outstanding protection from wind during high exertion watersports by regulating body temperature and preventing windchill.

BREATHABLE

With breathable wicking properties that are 10 times more breathable than competitors, vapor passes through the microfibrils of the membrane when the body sweats to draw sweat outward.

3. INNER FLEECE

QUICK DRY AND WICKING

A capillary effect pulls moisture away from the body towards the outer layer of the suit and a hydrophobic treatment repels water, accelerating suit drying time.

ANTI-MICROBIAL

Microban® antimicrobial treatment provides an added level of protection against damaging microbes such as bacteria that can cause stains, odors, and deterioration of the suit.

EXOWEAR

INNOVATION

3D PATTERNING

3D Patterning ensures the best shape and fit are achieved by evaluating the tension of the fabric and determining the optimum measure of elasticity and movement.

4-WAY STRETCH

4-Way Stretch knit fabric provides more elasticity over 2-way stretch and enhances the freedom of movement by stretching crosswise and lengthwise, compared to 2-way stretch fabric that only stretches in one direction.

OMNIRED™ TECHNOLOGY

Omnired Infrared Technology is scientifically-proven to deliver thermal warmth and protection, better circulation and faster recovery. Omnired has been proven to provide warmth for longer than similar technology.

WHETHER WINDSURFING, DIVING, SNORKELING OR KAYAKING, EXPERIENCING MORE TIME ABOVE AND BELOW THE WATER IS WHAT MATTERS MOST.

BARE WARMTH

At BARE, we're obsessed with delivering you the ultimate in exposure-wear performance. From the dive site to surf break, we're always looking for new ways to innovate our suits and accessories to enhance your experience in the water. This tireless search has led us to developing and integrating numerous technologies into our three tiers of immersion wear: Ultrawarmth Graphene, Ultrawarmth and S-Flex. Each offers a unique set of features and value matched for different needs in the water.

SUSTAINABILITY	Limestone Neoprene	●	●	●
	Water Based Glue	●	●	
	Dope Dyed Fibres	●	●	

TECHNOLOGY

GRAPHENE FIBERS

Graphene is the world's thinnest and strongest heat-conducting material. By using natural heat-capturing characteristics, graphene lining warms up faster than traditional neoprene and holds its heat for longer in-and-out of the water.

OMNIRED™ TECHNOLOGY

Omnired™ Technology is proven to deliver thermal warmth, protection, and faster recovery. Composed of 13-thermo reactive minerals that are embedded in the fabric of your suit, Omnired™ converts outbound body heat into thermal energy and reflects it back to your body. This allows you to maintain optimal body temperature and stay warm in the water for longer than a traditional, non-Omnired suit.

BAREFIT PATTERNS

Fit, comfort and performance are at the heart of everything we do and work toward at BARE. Our proprietary BAREfit Patterns play a large role in that, simultaneously bringing together flexibility and performance all under one seam. In fact, we believe so much in our BAREfit patterns, you have a full two weeks to return your suit if it doesn't fit to your level of expected performance.

SUSTAINABILITY

LIMESTONE NEOPRENE

Our wetsuits are made using a clean limestone-based foam that minimizes pollution while performing at the same level (or higher) as petroleum-based alternatives. Limestone neoprene provides better insulation in the water, increased stretch and comfort, a lightweight feel and strong durability.

WATER-BASED GLUE

We use a water-based glue, rather than solvent, that performs equally well over the long life of your suit, but spares the air of unclean toxins during the production process. Although our glue is water-based, it won't dissolve in water. It is just as strong, if not stronger, than traditional wetsuit glue.

DOPE-DYED FABRIC

To combat water waste and chemical discharge during production, we use dope-dyed fabric. Dope-dyed fabric requires less chemical waste than traditional methods, such as wet processing, and can cut overall water consumption by over 10%. Plus, dope-dyed fabrics are generally more economical than their dirtier cousins, benefitting both the price tag and the environment.

TO REDUCE OUR ECOLOGICAL FOOTPRINT, MOST OF OUR PRODUCTS NOW COME IN RECYCLEABLE BAGS OR CARDBOARD BOXES THAT MAY BE RECYCLED.

Thank you for helping us minimize our environmental impact!

(MLS, LS, XLS, 2XLS, MT, MLT, LT, XLT - Available in black only)

FEATURES

- Graphene Omnired placed strategically in the body's core area of the suit, allowing lateral movement of the warmth generated by the body to move from warm areas of the lining to cooler areas
- Velcro® adjustable 360° neck seal with booklet-style cover to prevent the Velcro® from snagging and pilling the suit
- Seamless underarms for superior comfort when worn on its own, with an additional wet layer or with a BCD
- Extra long 53.3 cm (21") back zipper for easy entry.
- Full length zipper puller with silicone print for easy grip; grip tab at base
- Skin-2-Seal sealing at the wrists and ankles, minimizing water entry through the sleeves and legs and allowing boots and gloves to integrate with the Glideskin seals
- PROTEKT highly flexible, durable, abrasion-resistant kneepads
- Anatomically correct pattern for three dimensional fit throughout for superior fit, comfort, and mobility
- Neck zipper to eliminate any pressure at the neck between dives
- Secure strap on each wrist to secure a wrist computer in place
- Packaged with re-usable hanger and PLA Compostable/Recyclable Bag

7MM + 5MM:

- Comfortable contoured 5mm Glideskin collar with 360 degree neck seal
- Wrist and ankle zippers for easy donning
- Skin-to-seal double 3mm/2mm Glideskin wrist and ankle seals, with fused-cut finished edges

3MM:

- Comfortable contoured 3mm Glideskin collar with 360 Velcro® adjustment
- Skin-in fused cut wrist and ankle seals

WITH
THERMAFSKIN

When a diver needs a little more thermal protection than their full suit can provide, this soft, comfortable S-FLEX layer ensures a soft, supple fit and increased warmth on colder dives.

MATERIAL:

3mm S-FLEX Full-stretch neoprene and Thermalskin. Thermalskin is a type of neoprene surface finish used on the inside of the layering piece which adheres well to the skin improving the seal and reducing flushing.

FEATURES:

- S-FLEX is developed from a proprietary blend of neoprene that generates extreme levels of stretch for an easy in, easy out of the suit, improves comfort and mobility, and is wrapped in a buttery soft exterior finish
- Pullover style layering piece for added warmth under any full suit
- Edges finished with stretch nylon binding
- Double glued with Secure-lock construction

COLORS: Black

SIZES: S, ML, L, 2XL, 3XL

PRODUCT NUMBER 003171BLK (CLOSE-OUT)

1MM HOODED VEST WHILE SUPPLIES LAST

For a little more thermal protection in tropical waters, this soft, comfortable add-on instantly delivers the properties and performance of a heavier thickness in a full suit. S-FLEX ensures a soft, supple fit, easy in, easy out.

MATERIAL:

1mm S-FLEX Full-stretch neoprene with Thermalskin. Thermalskin is a type of neoprene surface finish used on the inside of the layering piece which adheres well to the skin improving the seal and reducing flushing.

FEATURES:

- S-FLEX is developed from a proprietary blend of neoprene that generates extreme levels of stretch for an easy in, easy out of the suit, improves comfort and mobility, and is wrapped in a buttery soft exterior finish
- Ideal tropical diving companion
- Pullover style layering piece for added warmth under any full suit
- Edges finished with stretch nylon binding
- Flatseam construction throughout for stretch and comfort

Aqua

SIZES

2, 4, 6, 8, 10, 12, 14 (4T, 6T, 8T, 6+, 8+, 10+, 12+ - Available in black only)

FEATURES

- Graphene Omnired placed strategically in the body's core area of the suit, allowing lateral movement of the warmth generated by the body to move from warm areas of the lining to cooler areas
- Velcro® adjustable 360° neck seal with booklet-style cover to prevent the Velcro® from snagging and pilling the suit
- Seamless underarms for superior comfort when worn on its own, with an additional wet layer or with a BCD
- Extra long 53.3 cm (21") back zipper for easy entry.
- Full length zipper puller with silicone print for easy grip; grip tab at base
- Skin-2-Seal sealing at the wrists and ankles, minimizing water entry through the sleeves and legs and allowing boots and gloves to integrate with the Glideskin seals
- PROTEKT highly flexible, durable, abrasion resistant kneepads
- Anatomically correct pattern for three dimensional fit throughout for superior fit, comfort and mobility
- Neck zipper to eliminate any pressure at the neck between dives
- Secure strap on each wrist to secure a wrist computer in place
- Packaged with re-usable hanger and PLA Compostable/Recyclable Bag

7MM + 5MM:

- Comfortable contoured 5mm Glideskin collar with 360° degree neck seal
- Wrist and ankle zippers for easy donning
- Skin-to-seal double 3mm/2mm Glideskin wrist and ankle seals, with fused-cut finished edges

3MM:

- Comfortable contoured 3mm Glideskin collar with 360° Velcro® adjustment
- Skin-in fused cut wrist and ankle seals

Complete your wetsuit system with the warmest hood available.

MATERIAL:

Elastek outer fabric for great fit and stretch; high-loft Omnired technology in the fabric helps conserve lost body heat and accelerates thermal recovery.

FEATURES:

- Elastek outer fabric and high-loft Omnired inner fabric
- Elastek/Glideskin-in trimmable face and neck glides nicely over your hair
- Hood neck seal mates with drysuit seal/wetsuit collar
- BARE's GEN2 hood vent allows trapped air to escape without letting water enter
- Mask strap grip pad on the back of the hood secures your mask strap in place
- Double glued and blind stitched with secure-lock construction improves isolation and reduces flushing keeping you warmer and diving longer
- Packaged in re-usable mesh bag

3/2MM MANTA FULL

Ideal for mellow outings in forgivingly warm waters, the 3/2mm Manta Full is perfect for a causal day in the water. Tough neoprene beats back abrasions and an anatomical fit optimizes comfort for hours of movement.

MATERIAL:

3mm neoprene torso with 2mm arms and legs.

FEATURES:

- Heavy-duty back zipper
- BARESKIN chest plate sheds water and increases warmth
- Rolled edges with zigzag stitching on arms and legs
- Armor-flex kneepads provide total flexibility, durability and comfort
- Anatomically correct pattern for 3D fit throughout
- Flatseam construction throughout for stretch and comfort

COLORS: Blue, Purple

SIZES: 6, 8, 10, 12, 14, 16 yrs

PRODUCT NUMBER 002864BLU, 002864PUR

7/6MM HOODED + 7/6MM + 5/4MM MANTA FULL

From big days exploring the reef to taking laps in the deep end of the pool, the Manta Full is a great suit for extending your session in cooler waters. Burly 7/6mm neoprene and a cozy hood keeps heat consolidated on any adventure.

MATERIAL:

7/6: 7mm neoprene torso with 6mm arms and legs.

5/4: 5mm neoprene torso with 4mm arms and legs.

FEATURES:

- 7/6mm: Comfortable 5mm Glideskin collar with Velcro® adjustment
- 5/4mm: Comfortable 3mm Glideskin collar with Velcro® adjustment
- Heavy-duty back zipper with skin-to-skin internal sealing flap
- Loop at base of zipper assists donning
- Internal skin-in flip seals at mid-forearm and mid-calf to reduce water entry
- Armor flex kneepads provide total flexibility, durability and comfort
- Anatomically correct pattern for 3D fit throughout
- Heavy-duty ankle zippers for easy donning
- Double-glued with secure-lock construction

BARE DRYSUIT RATINGS

At BARE, we strive for our drysuits to provide ultimate comfort in all elements. Our custom design and advanced materials combine to ensure optimal fit, ease of movement, comfort, and protection from abrasions and punctures. Every suit we craft has a purpose, and is tailored for all types of situations. BARE is increasing its commitment to choice by providing our official drysuit ratings, so our customers can better evaluate their purchases.

The chart below provides each drysuit with a rating between 1 and 10, in the categories of

FIT

**FLEXIBILITY &
EASE OF MOVEMENT**

**ABRASION
RESISTANCE**

DURABILITY

FIT DEFINITIONS

FORM - a snug-fitting suit similar to a wetsuit. Applies to stretch neoprene suits.

CLOSE - a trim low profile fit.

REGULAR - capable of moderate-to-heavy undergarments and holds more gas volume.

LOOSE - for dives in extremely cold conditions to accommodate heavier undergarments.

Suit Model	Fit	Flexibility & Ease of Movement	Abrasion Resistance	Puncture Resistance

AUTOGRAPH SERIES X-MISSION EVOLUTION

NEW

LEGENDARY FIT WITH A UNIQUE FLAIR

The X-Mission Evolution Autograph Series carries forward the X-Mission legacy of movement-first design, delivering the same streamlined mobility with a refined premium edge. Distinctive color accents and elevated styling enhance the suit's visual presence, creating a bold, premium look that matches its high-performance technical design.

FIT: REGULAR	
FLEXIBILITY	8
ABRASION RESISTANCE	7
PUNCTURE RESISTANCE	9

MATERIALS

Extremely flexible Nylon Micro RipStop Trilaminate is durable and lightweight.
Weight: 395 gr/sqm (14oz/sqm).

COLORS

SIZES

S, M, MS, MT, ML, MLS, MLT, L, LS, LT, XL, XLS, XLT, 2XL, 2XLS, 3XL, 3XLS, 4XL, 4XLS, Made-To-Measure

FEATURES

- 1000D Overlay Reinforcement - A lightweight abrasion-resistant overlay reinforces the torso's highest-contact zones for enhanced durability under harness load, surface contact, and overhead exposure.
- High-Wear Zone Reinforcement - Strategically placed protection across the chest and shoulders helps defend against repeated wear from technical equipment and environmental abrasion.
- An elevated take on the X-Mission Evolution for divers seeking a more exclusive version of a proven technical platform.
- 2MM nylon/smoothskin "Smart Collar" with vented neck drain provides an improved seal with the BARE dry hood
- Low profile valves
- Removable inflator valve backer pad reduces discomfort as a result of the "squeeze" at depths
- Anatomically shaped torso, arms and legs
- Lightweight low profile plastic dry zipper and offset protected zipper flap to avoid contact between dry zipper and outer flap
- Low back M-PADZ reinforcement panel for added durability
- Adjustable elastic waistband at the back of the drysuit for snugging up for that perfect fit
- Includes field-replaceable 4-point suspenders
- M-PADZ knee protection
- Includes Tech Boots
- 2 Color Coordinating Tech/Cargo pockets - with zipper on flap
- Pockets w/ 5 bungee cords (3 regular / 2 thick)
- 2 needle "felled seam" construction increases seam integrity, is low profile and less prone to abrasion and finishes for a clean look
- Flexible double taped reinforcement at "critical wear" seam points for added durability

FOR THE MOST ADVENTUROUS DIVES

FIT: REGULAR	
FLEXIBILITY	7
ABRASION RESISTANCE	10
PUNCTURE RESISTANCE	10

The Expedition series suit is constructed out of our most durable and abrasion-resistant fabric, with a cut and fit that more closely resembles the X-Mission. We've bolstered this suit with hardwearing features that minimize bulk and improve flexibility and performance in the water for technically demanding dives. Material ratings make it one of the most robust and longest wearing suits on the market, while simplified seam construction improves the suit's durability and longevity.

MATERIALS

A proprietary blend of lightweight and flexible heavy-duty Nylon and Cordura® fabrics improves overall suit durability extending the life of your drysuit.

Cordura® RipStop fabric for additional protection on the lower sleeves, crotch/seat and lower legs.

SENTRY TECH/PRO DRY

THE DRYSUIT THAT DOES IT ALL

The Sentry Drysuit incorporates thermal and operational capabilities to meet the demands of the commercial or military diver with the flexibility and comfort of a warm water wetsuit. The Sentry is constructed using high density Yamamoto neoprene, our No Stitch Technology, and BARE's latest innovation in torso expansion: Automatic Torso X-Tension system (ATX), that works without the restrictions of a crotch strap.

Our design team has created a suit that delivers the best mix of attributes available in any drysuit on the market today. If you have been looking for the one drysuit that does it all, you've found it.

FEATURES

- ATX (Automatic Torso X-Tension System) with built-in suspenders for torso length adjustment, breathability and easy donning and doffing (with secure chest pocket) - TECH DRY ONLY
- Initially developed by BARE in 2000, the improved NST (No Stitch Technology) for more durable seam construction
- Lightweight and low profile YKK plastic dry zipper
- Low-Profile Values
- Anatomically-shaped torso, arms and legs
- 2mm nylon/smoothskin "Smart Collar" with vented neck drain provides an improved seal with the BARE dry hood
- Kevlar® kneepads for extra durability and comfort
- Tech Boots
- Two large expandable Tech/Data pockets with zipper on flap includes 5 bungee cords 3 regular/2 thick

INCLUDED: Drysuit Duffel

TRILAM TECH/PRO DRY

DESIGNED TO BE LIGHTWEIGHT AND FLEXIBLE

TECH DRY: This drysuit uses our exclusively engineered trilaminate material that is designed to be lighter weight and more flexible than traditional trilaminates. The front entry zipper is low-profile and flexible for easy donning.

PRO DRY: Made with our exclusive lightweight and flexible trilaminate material, this drysuit features a low-profile rear-entry zipper for a premium fit that minimizes restriction of the diver's movement, while remaining an economically priced option for the recreational diver.

These two suits are practical and technically-sound drysuits for the recreational diver ready to push the boundaries of adventure.

MATERIALS

Made with our exclusive engineered butyl trilaminate material (durable polyester/butyl/polyester)

LEGENDARY FIT WITH A UNIQUE FLAIR

The X-Mission Evolution Autograph Series carries forward the X-Mission legacy of movement-first design, delivering the same streamlined mobility with a refined premium edge. Distinctive color accents and elevated styling enhance the suit's visual presence, creating a bold, premium look that matches its high-performance technical design.

MATERIALS

Extremely flexible Nylon Micro RipStop Trilaminate is durable and lightweight.
Weight: 395 gr/sqm (14oz/sqm).

COLORS

SIZES

XS, XSS, S, SS, M, MS, MT, L, LS, XL, XLS, Made-To-Measure

FEATURES

- 1000D Overlay Reinforcement
- A lightweight abrasion-resistant overlay reinforces the torso's highest-contact zones for enhanced durability under harness load, surface contact, and overhead exposure.
- High-Wear Zone Reinforcement
- Strategically placed protection across the chest and shoulders helps defend against repeated wear from technical equipment and environmental abrasion.
- An elevated take on the X-Mission Evolution for divers seeking a more exclusive version of a proven technical platform.
- 2MM nylon/smoothskin "Smart Collar" with vented neck drain provides an improved seal with the BARE dry hood
- Low profile valves
- Removable inflator valve backer pad reduces discomfort as a result of the "squeeze" at depths
- Anatomically shaped torso, arms and legs
- Lightweight low profile plastic dry zipper and offset protected zipper flap to avoid contact between dry zipper and outer flap
- Low back M-PADZ reinforcement panel for added durability
- Adjustable elastic waistband at the back of the drysuit for snuggling up for that perfect fit
- Includes field-replaceable 4-point suspenders
- M-PADZ knee protection
- Includes Tech Boots
- 2 Color Coordinating Tech/Cargo pockets – with zipper on flap
- Pockets w/ 5 bungee cords (3 regular / 2 thick)
- 2 needle "felled seam" construction increases seam integrity, is low profile and less prone to abrasion and finishes for a clean look
- Flexible double taped reinforcement at "critical wear" seam points for added durability

X-MISSION EVOLUTION

INNOVATIONS FOR TECH, READY FOR REC

The X-Mission is ideal for the advanced technical diver, or the recreational diver who wants the best combination of flexibility and durability in a travel friendly package. This innovative drysuit uses our most advanced materials and construction methods, designed and purpose-built by our all-female design team in partnership with female members of a technical cave dive team to meet their demanding requirements. The lightweight and durable Nylon RipStop material is perfect for high abrasion resistance in the water and on the surface and, packs perfectly for travel.

LONG LASTING FOR THE MOST ADVENTUROUS DIVES

The Expedition series suit is constructed out of our most durable and abrasion-resistant fabric, with a cut and fit that more closely resembles the X-Mission. We've bolstered this suit with hardwearing features that minimize bulk and improve flexibility and performance in the water for technically demanding dives. Material ratings make it one of the most robust and longest-wearing suits on the market, while simplified seam construction improves the suit's durability and longevity.

GUARDIAN TECH/PRO DRY

THE DRYSUIT THAT DOES IT ALL

The Guardian drysuit incorporates thermal and operational capabilities to meet the demands of the commercial or military diver with the flexibility and comfort of a warm water wetsuit. The Guardian Tech Dry is constructed using high density Yamamoto neoprene, our new and improved No Stitch Technology, and BARE's latest innovation in torso expansion: Automatic Torso X-tension system (ATX), that works without the restrictions of a crotch strap.

Our design team has created a suit that delivers the best mix of attributes available in any drysuit on the market today. If you have been looking for the one drysuit that does it all, you've found it.

NEX-GEN TECH DRY NEW

FRONT-ENTRY PERFORMANCE. PROVEN IN CONTAMINATED WATER.

The Nex-Gen Tech Dry is built for divers who demand durability, reliability, and practical functionality in a drysuit. Constructed with BARE's lightweight waterproof Nex-Gen welded bilaminate fabric, the suit delivers dependable protection in cold-water and professional dive environments, including those involving contaminated water. Designed for convenience and independence, the Nex-Gen Tech Dry replaces the traditional back-entry configuration with a front cross-chest dry zipper, making it easier to gear up without assistance while maintaining the rugged durability the Nex-Gen platform is known for.

FIT: LOOSE	
FLEXIBILITY	7
ABRASION RESISTANCE	9
PUNCTURE RESISTANCE	7

MATERIALS

BARE's exclusive Nex-Gen fabric is highly abrasion- and contamination-resistant and can be used in a variety of diving conditions – from recreational to commercial (abrasion-resistant polyurethane/nylon bilaminate). Bilaminate fabric is extremely lightweight and packable for easy transportation to and from the dive site.

COLORS

Black

SIZES

XS, S, M, MT, ML, MLS, MLT, L, LS, LT, XL, XLS, XLT, 2XL, 2XLS, 3XL

FEATURES

- Front cross-chest dry zipper for convenient self-entry
- BARE exclusive Nex-Gen welded bilaminate fabric
- Lightweight nylon / polyurethane bilaminate construction
- SWT – Seam Welded Technology for strong waterproof seams
- Choice of Trimmable latex neck seal or neck ring system for a customizable fit
- Choice of bottleneck latex wrist seals or cuff ring systems for a customizable fit
- 360° swivel inflator valve for easy hose routing
- Low-profile adjustable exhaust valve
- MELCO T5500 reinforced knee pads with neoprene backing for durability and comfort
- Choice of BARE's 6 boot styles including the 4mm Full Rubber Boot
- Modern screened graphics

PERFORMANCE & CONSTRUCTION

Nex-Gen Fabric Platform

The Nex-Gen Tech Dry utilizes BARE's exclusive welded bilaminate fabric, engineered to balance durability, flexibility, and comfort. This construction resists abrasion while remaining lightweight enough for extended dives and travel.

Seam Welded Technology (SWT)

All seams are built using SWT construction, providing strong, waterproof joints designed to perform in demanding dive conditions. Using hot air, polyurethane tape is applied to a sewn seam, combining the seam and tape into a weld. The combination actually becomes stronger than the surrounding material—creating an unbreakable seam. SWT can be found on the Nex-Gen Drysuits.

NEX-GEN PRO DRY

DURABILITY MEETS PRACTICALITY

FIT: LOOSE	
FLEXIBILITY	7
ABRASION RESISTANCE	9
PUNCTURE RESISTANCE	7

The BARE Nex-Gen is a back entry drysuit designed with a bilaminate material featuring a durable Polyurethane exterior. The suit boasts RF welded seams and a standard YKK Aquaseal® dry zipper, making it ideal for use in slightly contaminated waters where chemicals are present. The external material allows any dirt or sludge to be easily washed off with fresh water after diving. The Nex-Gen Drysuit offers exceptional protection and durability, making it a reliable choice for divers operating in chemically contaminated environments. With various customizable options and rigorous certifications, it ensures safety and functionality for professional and recreational use.

MATERIALS

BARE's exclusive Nex-Gen fabric is highly abrasion- and contamination-resistant and can be used in a variety of diving conditions – from recreational to commercial (abrasion-resistant polyurethane/nylon bilaminate). Bilaminate fabric is extremely lightweight and packable for easy transportation to and from the dive site.

Women's: XS, S, M, L, XL, (MT)

FEATURES

- **Material:** Bilaminate with Polyurethane exterior
- **Seams:** RF welded for maximum durability
- **Zipper:** Standard YKK Aquaseal® dry zipper, RF welded
- **Ideal Use:** Slightly contaminated waters with chemical and body fluid presence
- **Maintenance:** Easy to clean with fresh water
- **Valves:** Low-profile valves
- Pre-installed suspender tabs

OPTIONS AVAILABLE

- Latex neck seal/latex hood combo
- Cuff-rings
- Neck ring
- Brass zipper instead of plastic
- Full rubber boots for surface use
- Full rubber boots for underwater diving
- Hip pockets
- Nex-Gen Pocket w/Flap
- Nex-Gen Zipper Flap

CERTIFICATION AND TESTING

- Tested by a CE approved laboratory
- Certified as Personal Protective Equipment (PPE)
- **Achieved highest level (Class 6) for resistance to permeation of chemicals**
- Complies with EU norms: EN 16523-1:2015-04 and EN 6529:2003-01A
- Meets EN 1422502:2019 standards in full applicable scope
- Nex-Gen Material complies with DIN EN 14126:2004-01A
- **Standard refers to clothing for protection against contact with blood and body fluids.**
- **Scope of the Standard is the determination of resistance of protective clothing materials to penetration by blood-borne pathogens.**

TRILAM SEARCH & RESCUE TECH DRY

FIT: REGULAR	
FLEXIBILITY	8
ABRASION RESISTANCE	8
PUNCTURE RESISTANCE	9

DESIGNED TO BE LIGHTWEIGHT AND FLEXIBLE

This is a suit specially designed for Search and Rescue activities. It is lighter weight and more flexible than traditional trilaminates. This suit features a brass main entry zipper, and includes a protective zipper cover. The suit also comes as standard with HD Dry Boots with a steel toe-cap and sole.

*Pockets and crotch strap not shown

MATERIALS

Made with our exclusive engineered butyl trilaminate material (durable polyester/butyl/polyester)

COLORS

Red

SIZES

S, M, ML, L, XL, 2XL, 3XL

FEATURES

- Exclusively engineered, the material in the Trilam is lighter weight and offers enhanced flexibility over current butyl trilaminates, improving freedom of movement
- Brass main entry zipper including a protective zipper cover
- 2mm nylon/smoothskin smart collar with vented neck drain provides an improved seal with the BARE dry hood
- Low-profile exhaust valve
- Telescoping torso with elastic crotch strap, rear double anchor, and adjustable quick release front buckle
- Includes 4-Point suspenders
- BARE M-PADz knee protection
- Reinforced "critical-wear" seam points
- 2-needle "felled seam," glued and heat taped
- Reflective and highly visible yellow / silver / yellow stripes on wrist and ankle areas
- Reflective and highly visible yellow / silver / yellow stripe on back
- 2 Bellows Pockets with flap on left and right thigh as standard
- HD Dryboots with a steel toe-cap and sole

ULTRAWARMTH BASE LAYER (TOP & PANTS)

THE FIRST STAGE IN MOISTURE MANAGEMENT

Brave the icy waters with Ultrawarmth Base Layers featuring Omnired™ Infrared Thermal Technology – determined by the FDA as a heat recovery medical device. Ultrawarmth seals in warmth and creates a protective heat barrier so divers can stay warmer for longer, even during their most chilling adventures.

Advanced stretch breathable fabric draws moisture away from the body and creates a dry zone, next-to-skin barrier, while moisture is dispersed over a larger surface for quick evaporation. Power every dive with Ultrawarmth protection.

MATERIALS

Omnired Infrared stretch fleece

COLORS

Black/Lava (Men's) Black/Aqua (Women's)

SIZES

MEN'S: S, M, ML, L, XL, 2XL, 3XL, 4XL

WOMEN'S: XS, S, M, L, XL

FEATURES

- Omnired Infrared stretch fleece has smooth face for easy layering, fleece-brushed back for superior warmth and moisture-wicking performance with Microban® odor control
- Incorporates quick drying characteristics back on the surface and when suit is vented or removed
- High warmth-to-weight ratio delivers the exact warmth and breathability required for dive applications
- Flatlock seams to minimize chafing
- Mix and match sizes of top and pant for a perfect fit
- Pullover design with low crew neck (won't interfere with neck seal)
- Low profile, retractable thumb loops to assist donning
- Men's pants features a brushed elastic waistband for next-to-skin comfort
- Women's pants features a contoured waistband with a continuous drawcord
- Seamless crotch for comfort
- Spandex stirrups keep pants in place while donning mid layer and drysuit
- Packaged in cardboard box

FEATURES

- Primaloft® Insulation incorporates:
 - Warmth without bulk
 - Reduction of weight required to submerge
 - Breathable
 - Water Resistant
 - 90% Recycled Content
 - 100% PFC Free
- Ultra-fine fibers are designed to trap warmth. Allow comfort and thermal regulation.
- Includes moisture management technology that acts as a second stage in moisture movement away from the skin.
- Incorporates quick drying characteristics for rapid evaporation keeping you dry and comfortable
- High warmth-to-weight ratio delivers the exact warmth and breathability required for dive applications
- Zippered chest pocket designed to store keys or cards
- Thumb loops to keep sleeve in place while donning drysuit
- Extra-long front zipper (2-way convenience access)
- Hand warmer pockets
- Elastic waist cinch
- Stitched Buttonholes for P-valve installation
- Lycra stirrups keep pants in place when donning drysuit
- Packaged in BARE branded stuff sack bag

POLAR STRETCH MID-LAYER BOOT LINER

Advanced thermal technology

MATERIAL:

Stretch breathable and compression resistant made from polyester/spandex anti-microbial fleece. Includes Polartec Power Stretch® technology

FEATURES:

- Includes moisture management technology that acts as the second stage in moisture movement away from the skin
- Incorporates quick drying characteristics for rapid evaporation, keeping you dry and comfortable
- Includes anti-microbial properties that inhibit bacterial growth, keep the fabric fresh and provide odor control
- Flatseam stitching throughout
- Packaged in a PLA Compostable/Recyclable Bag

COLORS: Black

SIZES: 2XS/XS, S/M, L/XL, 2XL/3XL

PRODUCT NUMBER 018941BLK

MID-LAYER VEST POLAR STRETCH

An additional layering piece for extra cold dives.

MATERIAL:

Stretch breathable and compression resistant, made from polyester/spandex antimicrobial fleece. Includes Polartec® Power Stretch® technology.

FEATURES:

- Compression Resistant Fleece. Exclusively engineered, this is the first and only fleece fabric designed to be worn under a drysuit. Reduces the need for "loft" to create a thermal barrier thereby eliminating a "bulky" undergarment. It also maintains insulating values at changing depths, allowing the diver's core temperature to remain stable.
- 4-way stretch fleece
- High warmth-to-weight ratio delivers the exact warmth and breathability required for dive applications
- Includes moisture management technology that acts as the second stage
- Includes antimicrobial properties that inhibit bacterial growth, keeping the fabric fresh and providing odor control
- Center front zipper for easy entry
- Hand warmer zippered pockets with fleece lining
- Flatseam stitching throughout
- Perfect addition to any undergarment for additional core warmth on colder/longer dives, or just for hanging out
- Packaged in a PLA Compostable/Recyclable Bag

COLORS: Black

SIZES:

MEN'S: S, M, ML, L, XL, 2XL, 3XL

PRODUCT NUMBERS MEN'S: 018139BLK

CT200 POLARWEAR EXTREME

This underwear uses compressed Thinsulate™, which offers less bulk but still extremely effective insulation for everything but the coldest dives.

MATERIAL:

Super soft RipStop nylon exterior with B200 Thinsulate™ (6.2oz/yd2 / 210g/m2) insulated interior

FEATURES:

- Entry: Extra long front zipper ("2-way" convenience for men)
- Hydrostretch panels for ease of movement
- Lumbar-X-Tender panel in lower back
- Ribbed knit cuffs & collar for secure comfort and fit
- Hand warmer pockets
- Foot stirrups and thumb loops for donning ease
- Grommets positioned for air exhaust and moisture venting
- Articulated knees
- Embroidered BARE chest pocket with zipper
- Packaged in a PLA Compostable/Recyclable Bag

COLORS: Black

FORCE I BOOT

Force I is the essential boot to use with all drysuits with soft boots installed. Strong, versatile and breathable, it's the ultimate protective boot for the roughest of conditions.

FEATURES

- Excellent support, protection and grip for rocky shore entries, and entry of boat decks and ladders
- Heavy-duty sole for added durability and stability
- Durable, breathable, quick-drying materials used on the uppers
- 2mm abrasion resistant neoprene tongue with pocket to hold excess lace cord.
- Reinforced toe and heel cap for foot protection and durability
- Durable coated material around ankle and laces
- Fin tab to prevent strap movement
- Thumb loop on heel for easier donning
- Quick-lock lacing system or easy donning and doffing
- Cord locks on laces are easy to operate with gloved hands, and keep laces secure
- Small, durable, sueded BARE logo on outside ankle
- Packaged in re-usable mesh bag

VEGA INFLATION VALVE

The VEGA Inflation Valve is designed for extended range diving in cold environments. It combines inflation of gas and passage for power cables to heated undergarments, etc. Both ports are swiveling for optimized equipment configuration. The design of the cable port makes it ideal for a variety of cables.

FEATURES

- Available with low push button
- Both ports are swiveling
- Available with Int'l nipple
- Available with M16 x 1.5 (for 4.5-9 mm cable)
- Fits all SI Tech Valve ports
- Anti-friction washer
- Nipple cover to prevent ingress of particles

ANTARES QCS OVAL SET

THD040
PU RING

THD041
STIFFENING RING

The QCS Oval provides the user with the opportunity of quickly changing a torn or broken seal. It also offer a modularity to choose from a variety of seals. QCS Oval has a narrow and oval shape that makes it compact and comfortable.

FEATURES

- Includes: Wrist Seal (Silicone or Latex), PU-Ring and oval Stiff Ring
- Designed for use with silicone and latex seals
- Works as attachment platform for the ANTARES Dry Glove System
- A slim and comfortable solution with minimum bulk volume
- Increased freedom of movement
- Opportunity to choose from a variety of seals and to change them whenever you want to

TIP: Install the ANTARES QCS OVAL SET for a permanent installation that allows for instant replacement of wrist seal.

ANATARES OVAL DRY GLOVE SYSTEM ORDER AND FITTING INSTRUCTIONS:

1. If the customer already has a drysuit, which already has the Antares Oval Ring System attached to it, to be able to fit the Antares Dry Glove they would need to order the following:
 - a. Antares Dry Glove System THD035NCL-EA
 - b. Dry Glove Set 088947BLU
2. If the customer is ordering a drysuit with a normal latex wrist seal attached, to retro fit the Antares Dry Glove System, they would need to order the following:
 - a. Antares Dry Glove System THD035NCL-EA
 - b. Dry Glove Set 088947BLU
3. If the customer wants to install the complete Antares Dry Glove System on the drysuit, they need to order the following:
 - a. Dry Glove System THD035NCL-EA
 - b. Antares QCS Oval Set which consists of PU Oval Ring 2 x THD040BLK-EA
 - c. Oval Stiff Ring 2 x THD041BLK-EA
 - d. Dry Glove Set 088947BLU
 - e. Bottleneck Latex Wrist Seal TRRI05BLK

An underwater photograph showing a diver in a blue drysuit swimming over a sandy ocean floor with some green algae. The water is clear and blue.

The most seamless drysuit ordering system is online

DRYSUITS.BARESPO RTS.COM

At BARE, we ensure you get the highest quality drysuits for every dive situation. We have expanded that level of quality to our drysuit ordering process. You can order your drysuits through our seamless online portal, providing more clarity and efficiency to the ordering process. Within a few minutes, you can select the features, styles, colors, sizes, and much more, to ensure you control every facet of your drysuit order.

CHOOSE FROM TWO ORDERING OPTIONS

CUSTOM - (STOCK/BLANK)

Most Suit Options Available, Shorter Delivery Times,
Lower Cost. Preferred Choice for Drysuit Pros.

The most cost effective and quickest delivery option. We have streamlined our production process to allow approximately 70% of our suit options to be included in the Custom Stock Suits option, and our Custom Stock configurations represent the most popular features on the market.

**THIS OPTION SHIPS TO THE
DISTRIBUTOR WITHIN 4-6 WEEKS.**

LEAD TIMES MAY VARY DEPENDING ON SEASONAL FLUCTUATIONS.

- Most cost effective option
- Most time efficient delivery
- Includes most stock sizes, fitting over 90% of the divers wearing BARE suits
- Stock customizations available (except Aqua-Trek I Pro Dry)

CUSTOM BUILT MADE TO ORDER/MADE TO MEASURE

Maximum Configuration Flexibility with Longer Delivery
Times & Slightly Higher Cost

The Custom Built Option allows for the full range of choices that you expect from BARE, including MADE-TO-MEASURE (MTM) sizing and a larger selection of colors.

THESE SUITS TYPICALLY SHIP IN 7-8 WEEKS.

LEAD TIMES MAY VARY DEPENDING ON SEASONAL FLUCTUATIONS.

- Expands custom options available
- Includes all sizes and some customization without going to made to measure
- Made to measure size option available (added fees apply)
- Includes all color options offered
- Allows custom placement of valves

To ensure an accurate and efficient delivery process, BARE requires ALL drysuit orders to be ordered using the official BARE online drysuit order form. Go to drysuits.baresports.com.

BOOT OPTIONS:

A BOOT FOR EVERY UNDERWATER CHALLENGE - CHOOSE THE STYLE THAT MEETS YOUR DEMANDS!

HD BOOT

FEATURES

- 4mm compression resistant neoprene
- Heavy duty reinforced toe, upper and heel

SIZES

3XS, 2XS, XS, S, M, L, XL, 2XL, 3XL, 4XL

PRODUCT NUMBERS INSTALL HD BOOTS: 012900BLK

TECH BOOT

FEATURES

- 3mm compression resistant neoprene
- Streamlined sole and upper
- Ankle Velcro strap

SIZES

3XS, 2XS, XS, S, M, L, XL, 2XL, 3XL, 4XL

PRODUCT NUMBERS INSTALL TECH BOOTS: 013911BLK

STEEL TOE/SOLE BOOT

FEATURES

- Impact Protection: Steel toe caps protect against falling objects and compression, meeting safety standards for impact resistance.
- Puncture Resistance: Steel soles prevent sharp objects from penetrating through the boot, ensuring foot safety in hazardous conditions.
- Durability: Built with high-quality materials, these boots are designed for heavy-duty use, offering both comfort and long-lasting wear in rugged environments

SIZES

M, L, XL, 2XL, 3XL

PRODUCT NUMBERS INSTALL STEEL TOE/SOLE BOOTS: 0139300BLK

SOFT BOOT

FEATURES

- 4mm compression resistant neoprene
- Can be worn with a variety of over boots such as the BARE FORCE I boot

SIZES

2XS, XS, S, M, L, XL, 2XL, 3XL, 4XL (custom up to 7XL EE available)

PRODUCT NUMBERS INSTALL SOFT BOOTS: 012901BLK

4MM FULL RUBBER BOOTS

FEATURES

- 4mm compression resistant neoprene
- Full Rubber vulcanization for use in contaminated water conditions

SIZES

M, L, XL, 2XL, 3XL, 4XL

PRODUCT NUMBERS INSTALL FULL RUBBER BOOT FOR HAZMAT: 013960BLK

TRILAM SOFT BOOT

FEATURES

- Cordura Quadlamine Fabric
- Can be worn with a variety of over boots such as the BARE FORCE I boot

SIZES

M, L, XL, 2XL, 3XL, 4XL

PRODUCT NUMBERS INSTALL TRILAM SOFT BOOT: 912021BLK

BARE VOCABULARY

Over the years, our technical expertise has resulted in the development of many proprietary technologies and innovations. Below you will find a list of these along with a brief description to help you better understand BARE products.

AMARA PALM - Exceptionally durable, Amara material allows us to design a very thin glove that is incredibly strong and resistant to abrasion keeping your fingers and hands well protected.

ARMOR-FLEX PROTECTION - Uses a special combination of inks that are highly abrasion-resistant and flexible.

AUTOMATIC TORSO X-TENSION (ATX) - The ATX includes built-in suspenders for torso length adjustment, breathability and easy donning and doffing without the restrictions of a crotch strap.

COMPRESSED-DENSITY NEOPRENE - BARE's compressed-density neoprene uses an advanced process that alters the chemical formula during the neoprene foam manufacturing process that results in very dense neoprene foam. Although not compressed from a thicker neoprene sheet, it offers a greater degree of compression resistance than standard neoprene foam.

DIAMOND-TUFF - Found on all neoprene drysuits, it is an exterior fabric laminated to neoprene foam that is highly-abrasive and wear-resistant, extending the life of your drysuit.

DOUBLE GLUED CONSTRUCTION - Is a manufacturing technique where glue is applied to the ends of two pieces of neoprene prior to stitching them together. This reduces water penetration.

ELASTEK - Our premium full-stretch neoprene providing the highest degree of stretch and comfort.

GLIDESKIN - Is a special coating applied to neoprene for an easy glide-on donning and doffing experience and improved sealing reducing water circulation, and keeping you warm.

GRAPHENE OMNIRED - Graphene Omnired is placed strategically in the body's core area of the suit. Graphene elements woven into the suit's interior fabric allow for a lateral movement of the warmth area generated by the body to move from warm areas of the lining to cooler areas for added reflective properties to stay even warmer. Lab test have shown a 41°F (5°C) increase in temperature compared to the original Omnired technology.

HIGH-DENSITY NEOPRENE - Conventional 6mm neoprene found in our D6 HD drysuit. It provides maximum thermal protection and is enjoyed by divers who still prefer the feel and fit of a conventional neoprene suit.

HYDROSTRETCH - A full-stretch panel integrated around the circumference of the arm (where the upper arm of the drysuit underwear meets the shoulder) for improved upper mobility.

HYPER-COMPRESSED NEOPRENE - Featured in our Sentry/Guardian drysuits, 7mm neoprene foam is compressed down to 2mm through a process that uses a combination of heat, time and mechanical pressure. The extreme compression gives the material the best option for stability of buoyancy and thermal insulation with varying depths.

K-PADz - Kevlar®-like in abrasion and wear resistance, they provide a great balance between overall protection and stretch.

LUMBARE-X-TENDER - A full-stretch panel integrated into the lower lumbar area of the drysuit underwear for improved mobility.

M-PADz - Designed to work with our latest generation of supple drysuit fabrics to maintain their overall flexibility while providing the highest degree of protection.

NO STITCH TECHNOLOGY (NST) - Originally developed by BARE in 2000. This technology makes suits without a single seam stitch. Instead, seams are double glued and heat taped inside and out. This delivers superior performance and maximizes the life of your drysuit.

PFC-FREE - See Warranty and Sustainability Page

PRO DRY - A back-entry cross-shoulder drysuit with a dry zipper.

PROGRESSIVE FULL-STRETCH - Uses three different full-stretch fabrics targeted at different performance areas of the wetsuit improving overall performance.

PROTEKT - Uses a special combination of woven fabrics to provide the next generation of abrasion and wear-resistance and our highest level of stretch for unrestricted movement.

ROLLED GLIDESKIN SEALS - Is a sealing system that uses Glideskin rolled around the raw edge of the wetsuit at the wrist or ankle to provide just the right sealing for warmer water dives.

SCHOELLER® - KEPROTEC knee protection is an extremely abrasion and tear-resistant fabric. Incorporates Kevlar™ for the highest degree of protection from unwanted punctures and tears.

SEAM WELDED TECHNOLOGY (SWT) - This technology makes suits without a single seam stitch. Instead, seams are double glued and heat taped inside and out. This BARE exclusive delivers superior performance and maximizes the life of your drysuit.

SEAMLESS UNDERARMS - Eliminates seams running under the arm for improved comfort.

SECURE-LOCK - Is a process of joining neoprene on two sides (inside and out) where the stitching needle does not pass through the neoprene. This reduces the number of holes in the wetsuit and therefore less chance of water penetration. This technique also "locks" the stitching in the event that a thread is broken, not allowing it to unravel.

SET-IN SLEEVE DESIGN - Incorporates a seam around the shoulder for a closer fit around the arm for better flexibility.

S-FLEX - Developed from a proprietary blend of neoprene that generates extreme levels of stretch for an easy in, easy out of the suit, improves comfort and mobility, and is wrapped in a buttery soft exterior finish.

SKIN-IN FLIP SEALS - Located on the upper forearm or upper calf area of a wetsuit, SKIN-IN Flip Seals use the extremely effective contact between SMOOTHSKIN and skin to reduce water penetration.

SKIN-IN SEALS - Use Glideskin on the inside of the suit (usually around the neck, wrist and ankles) to provide a watertight seal against the skin.

SKIN-TO-SKIN SEALS - Is a double seal system found on the wrist or ankles where a boot or glove is sandwiched between two pieces of neoprene (one with GLIDESKIN-IN and one with Glideskin-OUT) providing an extremely effective seal, reducing water penetration.

SMOOTHSKIN - Neoprene is heat-pressed resulting in a smooth and "sticky" layer improving the seal against skin.

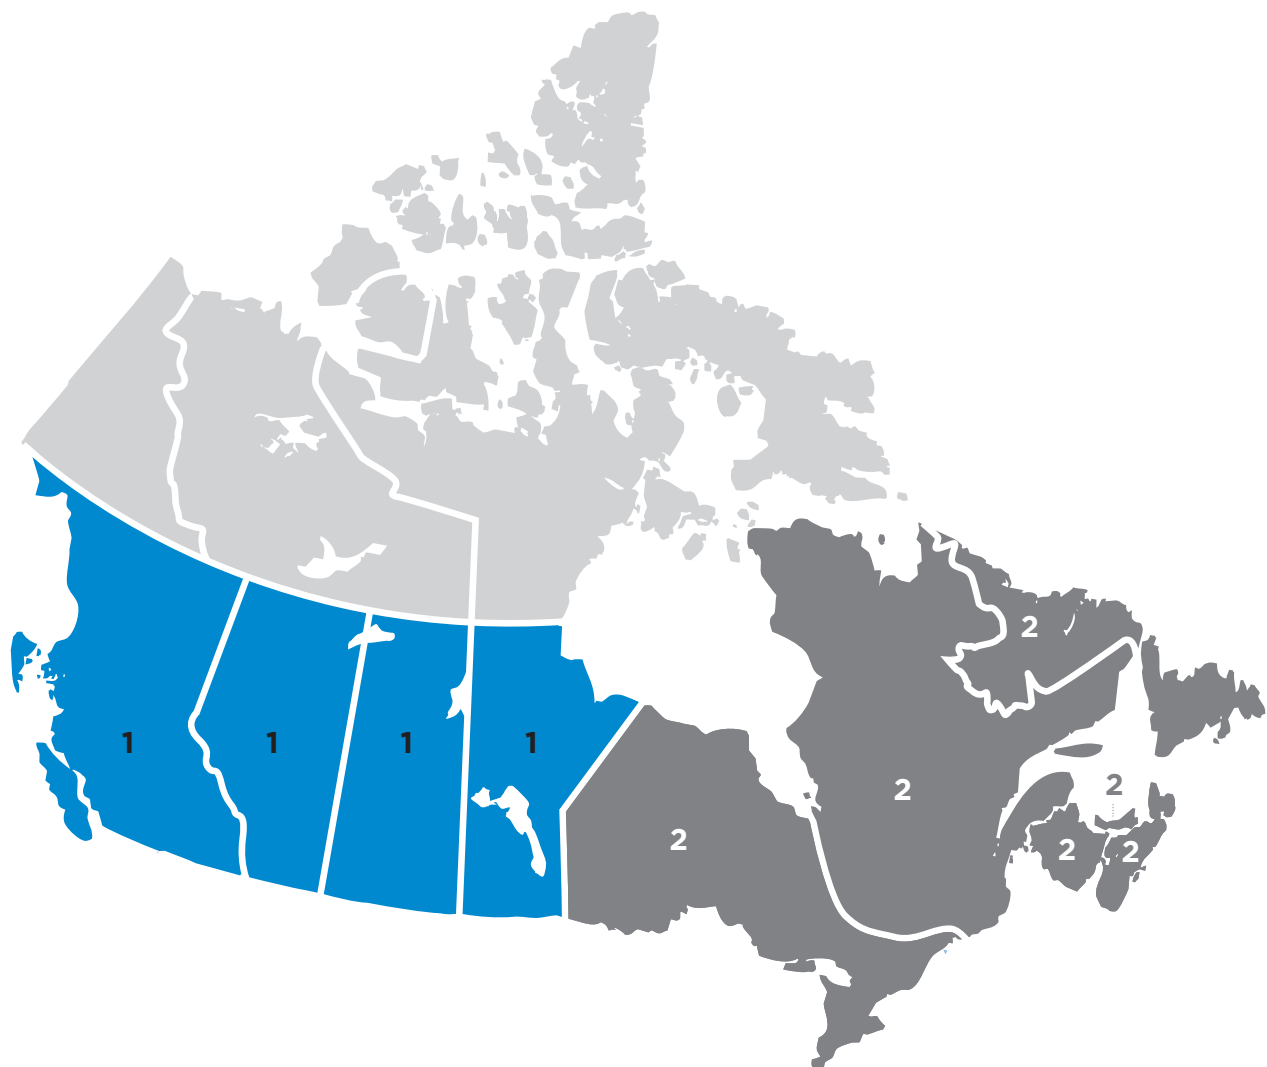

TECH DRY - A self-donning front entry drysuit with a dry zipper.

THERMALSKIN - Is a type of neoprene surface finish used on the inside of a layering vest which adheres well to the skin improving the seal and reducing flushing.

ULTRAWARMTH OMNIRED - 13 thermo-reactive minerals woven into the fabric of the wetsuit. These minerals react to your body heat converting it to infrared energy and reflecting it back to you, boosting circulation.

NOTES

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal grey lines across its entire width, providing a template for handwriting practice or general note-taking. The margins are consistent on all sides.

NOTES

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
